

B.Tech. (Computer Science and Business Systems)

CURRICULUM AND SYLLABUS HANDBOOK
Regulation 2023

Approved by Academic Council on 14.10.2024

2024-2025

A handwritten signature in black ink, appearing to be "R. Srinivasan", is positioned above the title.

Chairman - Board of Studies
Department of Computer Science and Business Systems
Sri Eshwar College of Engineering (Autonomous)
Kinathukadavu, Coimbatore - 641202.

1.0 Vision, Mission and Core Values of the Institution

Vision

“To be recognized as a premier institution, grooming students into globally acknowledged engineering professionals.”

Mission

We will achieve the Vision by:

- ✓ Providing outcome and value-based engineering education
- ✓ Nurturing research and entrepreneurial culture
- ✓ Enabling students to be industry-ready and fulfil their career aspirations
- ✓ Grooming students through behavioural and leadership training programs
- ✓ Making students socially responsible

Core Values

The following core values of Sri Eshwar College of Engineering are closely aligned with its vision and mission, supporting the college's goal of developing well-rounded, globally capable, and socially responsible engineering professionals:

1. Pursuit of Excellence,
2. Problem Solving Mindset
3. Spirit of Collaboration
4. Culture of Innovation
5. Responsibility to Society

2.0 Vision and Mission of the Department of Computer Science and Business Systems

Vision

“To become a centre of excellence in Software Engineering and Business Systems domains and evolve as an integrated facility in providing academic services that drive research and innovation, leading to industry advancements that serve society.”

Mission Statements

- M1: Develop a curriculum that meets the evolving demands of the industry, integrating inventive teaching approaches for comprehensive education.
- M2: Provide professional development opportunities for faculty members to enhance their expertise in IT and Management course.
- M3: Promote connections with stakeholders to encourage the sharing, utilization, and exchange of managerial expertise.
- M4: Initiate community-based activities that apply managerial expertise to effectively address societal issues
- M4: Build and upgrade facilities to ensure the delivery of modern IT and management education.

3.0 B.Tech. (CSBS) Program Educational Objectives (PEOs)

- PEO1: Pursue careers in IT and management specializations offered by institutions, utilizing the essential core competencies gained within an assessment-focussed learning environment
- PEO2: Graduates will enrol in a postgraduate program focussed on Information Technology and Management Sciences, paying the way for academic and research -oriented career path
- PEO3: Graduates will embark on an entrepreneurial path for their careers

Chairman - Board of Studies
Department of Computer Science and Business Systems
Sri Eshwar College of Engineering (Autonomous)
Kinathukadavu, Coimbatore - 641202.

4.0 Knowledge and Attitude Profile (WK)

- WK1:** A systematic, theory-based understanding of the natural sciences applicable to the discipline and awareness of relevant social sciences.
- WK2:** Conceptually-based mathematics, numerical analysis, data analysis, statistics and formal aspects of computer and information science to support detailed analysis and modelling applicable to the discipline.
- WK3:** A systematic, theory-based formulation of engineering fundamentals required in the engineering discipline.
- WK4:** Engineering specialist knowledge that provides theoretical frameworks and bodies of knowledge for the accepted practice areas in the engineering discipline; much is at the forefront of the discipline.
- WK5:** Knowledge, including efficient resource use, environmental impacts, whole-life cost, re-use of resources, net zero carbon, and similar concepts, that supports engineering design and operations in a practice area.
- WK6:** Knowledge of engineering practice (technology) in the practice areas in the engineering discipline.
- WK7:** Knowledge of the role of engineering in society and identified issues in engineering practice in the discipline, such as the professional responsibility of an engineer to public safety and sustainable development.
- WK8:** Engagement with selected knowledge in the current research literature of the discipline, awareness of the power of critical thinking and creative approaches to evaluate emerging issues.
- WK9:** Ethics, inclusive behaviour and conduct. Knowledge of professional ethics, responsibilities, and norms of engineering practice. Awareness of the need for diversity by reason of ethnicity, gender, age, physical ability etc. with mutual understanding and respect, and of inclusive attitudes.

5.0 B.Tech. (CSBS) Program Outcomes (POs)

- PO1: Engineering Knowledge:** Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
- PO2: Problem Analysis:** Identify, formulate, review research literature and analyse complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4)
- PO3: Design/Development of Solutions:** Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5)
- PO4: Conduct Investigations of Complex Problems:** Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
- PO5: Engineering Tool Usage:** Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6)
- PO6: The Engineer and the World:** Analyse and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to the economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
- PO7: Ethics:** Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9)
- PO8: Individual and Collaborative Teamwork:** Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.

PO9: Communication: Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences

PO10: Project Management and Finance: Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments.

PO11: Life-Long Learning: Recognize the need for, and have the preparation and ability for i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8)

6.0 B.Tech. (CSBS) Program Specific Outcomes (PSOs)

PSO1: To employ suitable methodologies, advanced tools, and modern engineering and business technologies, including prediction and data analytics, for addressing complex engineering tasks and business challenges

PSO2: To evolve Computer Science domain-specific techniques and approaches to support and enhance decision-making across diverse domains, including business processes and beyond

7.0 B.Tech. (CSBS) Program Curriculum

7.1. Curriculum Structure

The curriculum structure includes the following course categories:

Humanities and Social Sciences (HS): Technical English, Foreign Languages, Management & Engineering Ethics, and Engineering Economics.

Basic Sciences (BS): Mathematics, Physics, and Chemistry.

Engineering Sciences (ES): Materials Science, Workshop Practices, Drawing, and Fundamentals of Electrical, Electronics, Mechanical, and Computer Engineering.

Professional Core (PC): Courses specific to the chosen specialization or branch.

Professional Electives (PE): Elective courses within the chosen specialization (Vertical).

Open Electives (OE): Courses from other technical or emerging subject areas.

Project Work (PW): Projects involving Design Thinking (Product/Software Development Life Cycle), Innovative/Multidisciplinary Projects, Industry Projects, and other project work.

Employability Enhancement Courses (EM): Personality Development, Verbal and Soft Skills, Advanced Logical Thinking, and Industry or External Internships.

Mandatory Courses (MC): Heritage of Tamils (HSMC), Tamils and Technology (HSMC), Environmental Science, and Universal Human Values.

Optional Courses (OC): NCC Credit Course Level I, NCC Credit Course Level II, NCC Credit Course Level III and Honours Courses.

The Student Induction Programme (SIP) is an essential three-week orientation tailored for first-year undergraduate students enrolled in BE/B.Tech. programs. Held annually, this programme is designed to facilitate a smooth transition from secondary education to collegiate life, ensuring that students effectively integrate into both the academic and social environments of the institution.

Program Components

- ✓ Universal Human Values
- ✓ Health
- ✓ Department Familiarization
- ✓ Interactive Lectures

Chairman - Board of Studies
Department of Computer Science and Business Systems
Sri Eshwar College of Engineering (Autonomous)
Kinathukadavu, Coimbatore - 641202.

- ✓ Proficiency Modules
- ✓ Local Visits
- ✓ Cultural Activities

The SIP plays a pivotal role in setting the stage for a successful and fulfilling college experience, providing students with the tools and support necessary for a smooth transition into their academic and social life

Chairman - Board of Studies
Department of Computer Science and Business Systems
Sri Eshwar College of Engineering (Autonomous)
Kinathukadavu, Coimbatore - 641202.

7.2. B.Tech. (CSBS) - Curriculum

Outcome-Based Education (OBE) with Choice Based Credit System (CBCS).

8.0 B.Tech. (CSBS) SYLLABUS

SEMESTER I

U23MA203	Linear Algebra	L	T	P	J	C
		3	1	0	0	4
1. Course Description:						
This course encompasses matrix theory and linear algebra, focusing on concepts applicable across various disciplines. Linear algebra is a branch of mathematics that studies systems of linear equations and the properties of matrices. The course covers the theory of vector spaces and linear transformations as well as practical methods like diagonalization and row-reduction of matrices that can be used to solve problems in mathematical biology, engineering and economics. It finds widespread use in machine learning for solving linear regression, eigenvalue problems, orthogonalization and matrix inversion and enhancing numerical stability in various algorithms.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Explore about matrix method to solve linear equations. 2. Initiate the basic concepts in the vector space and its attributes. 3. Cultivate the knowledge in inner product spaces and its applications. 4. Enhance the knowledge in linear transformations. 5. Inculcate the concept of eigen values and eigen vectors. 						
3. Syllabus: 45 +15 =60 Periods						
Unit-I: Linear Equations						(9+3)
System of linear equations: Row reduction, echelon forms, Gaussian elimination method, Gauss Jordan method, LU decomposition, invertibility.						
Unit-II: Vector Spaces						(9+3)
Vector spaces: Subspaces, linear combinations, linear independence and linear dependence, basis and dimensions.						
Unit-III: Inner Product Spaces						(9+3)
Inner product: Norms, Gram-Schmidt orthogonalization process, QR decomposition, least square approximation.						
Unit-IV: Linear Transformations						(9+3)
Linear transformation: Null spaces, ranges, dimension theorem, matrix representation of a linear transformations; Inverse linear transformation.						
Unit-V: Eigen values and Eigenvectors						(9+3)
Eigen values and eigen vectors, Diagonalization: Orthogonal diagonalization; Reduction of quadratic form to canonical form; Singular value decomposition; Principal component analysis.						
List of Tutorials:						
<ol style="list-style-type: none"> 1. Working procedure, Basic commands and symbolic computation. (CO 1) 2. Solving several types of systems of linear equations. (CO 1) 3. Matrix decomposition - LU decomposition. (CO 1) 4. Shifting and scaling of vectors. (CO 2) 5. Matrix Operations. (CO 1) 6. Matrix decomposition - QR decomposition (CO 3) 7. Least Square method (case study). (CO 3) 8. Eigen values and Eigen vector computation. (CO 5) 						
Text Books:

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23MA203.1	Utilize fundamental concepts of the matrix method for solving linear equations.
U23MA203.2	Implement the principles of vector space and its characteristics to address real time problems.
U23MA203.3	Examine orthonormal basis within inner product spaces.
U23MA203.4	Articulate matrix role as a linear transformation within a finite dimensional space.
U23MA203.5	Discriminating the characteristics of a linear system with eigen values and vectors.

U23CS301	Problem Solving using C	L	T	P	J	C
		3	0	0	0	3

1. Course Description:

This course introduces students to the fundamental concepts of programming using the C language. The course covers essential topics such as basic C programming constructs, conditional and looping statements, modular programming, and advanced concepts like pointers, arrays, and structures. Through theoretical lectures, practical demonstrations, and coding exercises, students will develop problem-solving skills and learn how to design and implement efficient algorithms to solve a variety of complex problems.

2. Course Objectives:

1. Equip students with the skills to write robust, readable, and maintainable code for diverse applications.
2. Instruct students on utilizing control structures and functions to manage program flow, make informed decisions, and automate repetitive tasks.

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 441202.

3. Enhance students' abilities in optimizing memory usage and promoting code reusability.	
4. Guide students in efficiently organizing and processing data, enabling them to write clean, well-structured code that addresses real-world challenges.	
5. Train students in effectively working with strings, user-defined data types, and file operations.	
3. Syllabus:	45 periods
Unit-I: C Fundamentals	(9)
Basic computer organization, Problem-solving techniques, Algorithm, Flowchart, Pseudocode; Introduction to C programming: Phases of a C program, Features of C, Keywords, Variable Name, Scope, Declaration, Coding Standards, Data Types and sizes: integer, float and character types, constants, Formatted I/O, Operators, Bitwise Manipulations, Expression Evaluation, Type Conversions, Preprocessor Directives	
Unit-II: Control Structures	(9)
Conditional and Branching Statements: if, if-else, else-if ladder, nested-if, switch constructs, range using switch, Looping constructs: for, while, do-while -break and continue- goto and Label	
Unit-III: Pointers and Functions	(9)
Pointer - Types of Pointers: NULL, Dangling, Generic Pointers, Wild pointer, Arithmetic Operations in Pointer, Pointer to pointer, Functions: The anatomy of a function, Types of functions, Pointers and Function Arguments: Call by Value and Call by Reference, Function Pointers, return statement, Recursion, Storage Classes	
Unit-IV: Arrays	(9)
Arrays: Declaring and initializing 1D arrays, Two-dimensional arrays, Multi-dimensional arrays, Variable Length Arrays, Dynamic Memory Allocation, Passing 1D and 2D Array as arguments, Pointers and Arrays, Array of pointers	
Unit-V: Strings, User-Defined Data Types and Files	(9)
Strings: Introduction – string handling functions, Two-dimensional array of strings, Structure: Basics of structure- Nested structures–Array of structures – Pointer to structures – Unions - Bit Fields-Files: Basics– File Functions - Random Access Files

 Sri Eshwar College of Engineering (Autonomous)
 Kinathukadavu, Coimbatore - 641202.

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS301.1	Understand problem-solving techniques and typical programming constructs C
U23CS301.2	Apply looping and conditional constructs to solve real-world problems
U23CS301.3	Apply arrays and functions effectively to address complex programming challenges
U23CS301.4	Understand and apply best practices in pointers, memory allocation and error handling for modular programming efficiency
U23CS301.5	Choose and implement complex data structures using structures and Unions, applying advanced file operations in C for effective problem-solving

U23HS182	Business Communication and Value Science	L	T	P	J	C
		2	0	2	0	3
1. Course Description:						
This interdisciplinary course combines business communication principles with value science principles, focusing on clear communication strategies, stakeholder engagement, and value creation assessment. It enhances decision-making processes and understanding of synergy between communication and value science.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Help students learn why life skills like thinking, social, and emotional skills are important for personal and professional growth. 2. Introduce students to Howard Gardner's idea that there are different types of intelligence, helping them appreciate how these can be used in various situations. 3. Teach students ways to handle challenges, become more resilient, and improve their problem-solving and decision-making skills through group discussions and activities. 4. Help students better understand basic grammar rules, like parts of speech and tenses, to make their communication more accurate. 5. Encourage students to practice the life skills they learn in everyday situations, so they can handle challenges better and make good decisions. 						
3. Syllabus:		30+30=60 Periods				
Unit-I: Understanding Life Skills		(6)				
Life Skills – Importance and necessity, Thinking skill, Social skill, Emotional skill; Howard Gardner's Multiple Intelligence, Embracing Adversity and developing resilience - Problem-Solving techniques and Decision-Making Skills - Group discussions on resilience and adversity. Grammar: Parts of Speech, Tenses: Present tense, Single word Substitute.						
Unit-II: Communication Strategies		(6)				
Effective Communication, Types of Communication (Verbal, Non-verbal and Written Communication), Barriers to Effective Communication, Principles of Listening, The Process of Listening - Active Listening and Feedback Techniques: Enhancing communication effectiveness - Role-play exercises simulating different communication types - Listening activities focusing on understanding and feedback; Grammar: Tenses: Past tense, Types of Sentences, Articles.						

Unit-III: Values and Principles	(6)
Introduction to Values, Definition and Importance - Differences between Values and Principles and the necessity - Applying values and principles in real-life scenarios - Writing tasks on cohesion and coherence using discourse markers. Grammar: Vocabulary Enrichment, Tenses: Future Tense, Concord, Prefix & Suffix, Discourse Markers, Cohesion and Coherence in writing.	
Unit-IV: Business Ethics and Behaviour	(6)
Principles of clarity and brevity in writing, Completing sentence - Professional Etiquette in Written Communication - Importance in business contexts - Writing accurate and complete sentences - Practice sessions on writing concise business documents - providing clear instructions and recommendations. Grammar: Questions – Wh type, Yes/ No and Tag Question, Single sentence definition, Extended Definitions, Words often confused, Instructions, Recommendations.	
Unit-V: Speaking Skills	(6)
Reading practice based on Competitive Examinations; Writing: Preparing Transcripts for Speeches - Pictorial Representations: Flowcharts, Pie Charts, Bar Charts, Tabular Columns; Grammar: Single Word Substitutes - Spotting Errors; Listening to Eminent Personality Interviews & Other Forms of Interviews; Speaking - Compering, Welcome Address & Vote of Thanks	
List of Exercises:	30 periods
<ol style="list-style-type: none"> 1. Group discussions on resilience and adversity. (CO 1) 2. Grammar drills on question formation and sentence structure. (CO 2) 3. Listening activities focusing on understanding and feedback. (CO 2) 4. Role-play exercises simulating different communication types. (CO 5) 5. Writing tasks on cohesion and coherence using discourse markers. (CO 4) 6. Practice sessions on writing concise business documents. (CO 4) 7. Exercises on providing clear instructions and recommendations. (CO 3) 8. Mock interviews and role-play exercises focusing on pronunciation and enunciation. (CO 5) 9. Public speaking and presentation practice sessions. (CO 5) 10. Writing tasks on formal letters, emails, and summarization. (CO 4)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23HS182.1	Apply essential life skills for personal and professional development.
U23HS182.2	Develop effective communication strategies by mastering communication and overcoming common barriers.
U23HS182.3	Identify the difference between values and principles, and apply ethical decision-making in various contexts, enhancing personal integrity.
U23HS182.4	Analyze clarity and brevity in business writing, adhering to professional etiquette and ethical standards.
U23HS182.5	Make use of the effective interview techniques, pronunciation, public speaking, and formal communication practices to enhance effective communication skills.

U23PH281	Physics for Information Science	L	T	P	J	C
		3	0	2	0	4

1. Course Description:

Physics for information science is a fundamental course designed to provide engineering students with a strong foundation in the field of semiconductors, lasers, optical fibers, magnetic materials as well as quantum computing and their applications in the realm of information science to cater the need of non-circuit branch students to realize the feasible solutions involving latest technologies and related services.

2. Course Objectives:

1. Equip the students with a deep understanding of the properties of semiconducting materials and devices.
2. Facilitate the students to gain insights into the physics of laser and fiber optic communication.
3. Establish a solid foundation in the fundamentals of optical materials and their engineering applications.
4. Develop a thorough understanding of magnetic materials and storage applications.
5. Enable the students to realize the concept of the performance of optoelectronic devices and quantum computing.

3. Syllabus:**45 + 30=75 Periods****Unit-I: Basics of Semiconductor Devices****(9)**

Semiconductors: Properties; Classification: Elemental and Compound semiconductors; Intrinsic semiconductors: Number of electrons in conduction band, number of holes in valance band, carrier concentration, Electrical conductivity, Band gap determination;

Extrinsic semiconductors: N-type, P-type; PN junction diode: biasing, V-I characteristics; Hall effect: Determination of Hall coefficient, Applications.	
Unit-II: Laser and Fibre Optics	(9)
Lasers: population of energy levels, Einstein's A and B coefficients derivation; Resonant cavity, optical amplification (qualitative); Semiconductor lasers: Homo junction, hetero junction. Fiber optics: optical fiber principle, numerical aperture, acceptance angle; Types of optical fibres (material, refractive index, mode); Losses associated with optical fibers; Fibre optic sensors: Pressure and displacement.	
Unit-III: Optical Properties of Materials	(9)
Optical materials: Classification; Carrier generation, recombination processes; Absorption, emission scattering of light in metals, insulators, semiconductors (concepts only); Phototransistor; Solar cell; LED, Organic LED; Optical data storage techniques.	
Unit-IV: Magnetic Properties and Data Storage	(9)
Magnetic materials: Classification of dia, para, ferro magnetic; Origin of magnetic moment, Bohr magneton; Ferromagnetism: Domain theory, different types of energies involved in the domain growth; Hysteresis; Hard and soft magnetic materials, applications. Magnetic semiconductors, Magnetic principle in computer data storage, Magnetic hard disc (GMR sensor).	
Unit-V: Optoelectronic Devices and Quantum Computing	(9)
Quantum confinement; Quantum structures: Quantum wells, wire, dots; Quantum dot lasers; Single Electron Transistor (SET); Opto-electronic switches; Charge Coupled Devices; Quantum computing: Introduction, Classical bits, Quantum bits; Superposition, Entanglement. Quantum gates: Pauli's X, Y, Z, Hadamard, CNOT, Advantages, applications.	
List of Experiments:	30 Periods
<ol style="list-style-type: none"> 1. Calculate the energy band gap of a given semiconductor diode. (CO 1) 2. Construct the p-n junction circuit and measure the knee voltage and breakdown voltage from its forward and reverse bias V-I characteristics. (CO 1) 3. Estimate the wavelength of LASER using grating and measure the particle size using a Laser. (CO 2) 4. Compute the numerical aperture and estimate the acceptance angle of various optical fibers. (CO 2) 5. Analyse the input and output characteristics of an NPN transistor setting in the common emitter (CE) mode. (CO 3) 6. Compute the V-I Characteristics of LED and measure the Knee Voltage and Planck's Constant. (CO 3) 7. Compute and analyse the energy loss using B-H curve of a ferromagnetic material. (CO 4)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23PH281.1	Construct the knowledge on the basics of semiconducting materials, their behaviour and applications in various devices.
U23PH281.2	Explore the fundamentals of laser and optical fibres and to realize their typical parameters.
U23PH281.3	Infer the properties of optical materials and their optoelectronic applications.
U23PH281.4	Categorize the magnetic materials and investigate their role in data storage techniques.
U23PH281.5	Interpret the functioning of optoelectronic devices and the essentials of quantum computing.

 Chairman - Board of Studies
 Department of Computer Science and Business Systems

 Kinathukadavu, Coimbatore - 641202.

U23EC381	Electronics and Microprocessor	L	T	P	J	C
		3	0	2	0	4

1. Course Description:

This course offers an in-depth exploration of the fundamental concepts in semiconductor theory, diodes, and transistors. It features a detailed study of the 8085 microprocessor, where students will learn to write and implement assembly programs. Additionally, the course covers the 8051 microcontroller, focusing on its architecture, instruction set, and the principles of interfacing with peripheral devices. By the end of this course, students will have a comprehensive understanding of both microprocessors and microcontrollers, equipping them with the skills needed to excel in the field of electronics.

2. Course Objectives:

1. To facilitate understanding of semiconductor theory and diode operation.
2. To teach BJT and FET operation and biasing techniques.
3. To instruct on 8085 microprocessor architecture and assembly programming.
4. To teach 8051 microcontroller architecture and instruction set.
5. To explain interfacing principles and peripheral devices of the 8051.

3. Syllabus:

45 + 30 = 75 Periods

Unit-I: Diode and its Applications

(9)

Intrinsic and extrinsic semiconductor; P type and N type semiconductor; PN junction diode: properties, biasing and VI characteristics; half wave rectifier and centre tap full wave rectifier; Zener diode; Zener diode as voltage stabilizer.

Unit-II: Transistors and Amplifiers

(9)

Transistor: Transistor action, Transistor as an amplifier, CB, CE, CC connections and its comparison, transistor biasing; Field effect transistor: types, JFET, working principle, difference JFET and BJT; MOSFET: types, circuit operation of D-MOSFET and E-MOSFET.

Unit-III: Introduction to 8085 Microprocessor

(9)

8085 Hardware Architecture; 8085 Pin out; register organization; addressing modes; instruction set; programming 8085 (commonly used instructions only).

Unit-IV: Introduction to 8051 Microcontroller

(9)

8051 architecture; memory organization; special function registers; port operation; timer/counters; serial interface; interrupts; operand addressing; instruction set.

Unit-V: Interfacing 8051 Microcontroller

(9)

LCD & Keyboard Interfacing; ADC, DAC & Sensor Interfacing; External Memory Interface; Stepper Motor and Waveform generation.

List of Experiments:

(30 Periods)

1. Develop the circuit of the P-N junction diode and plot the V-I characteristics to determine the knee voltage by varying the forward bias voltage and current in reverse biased condition due to minority carriers. (CO 1)
2. Analyze the breakdown mechanism of Zener diode for voltage regulation in a circuit with varying load currents and plot its VI characteristics. (CO 1)
3. Construct the circuit of BJT in Common Emitter Configuration and plot its input and output characteristic curves by varying the V_{BE} and V_{CE} and plotting the I_B and I_C . (CO 2)
4. Write assembly language programs using 8085 instructions for performing various arithmetic and logical operations and verify the same for various test cases. (CO 3)
5. Write assembly language programs using 8051 instructions for performing various arithmetic and logical operations and verify the same for various test cases. (CO 4)
6. Design of simple automation projects using 8051 Microcontroller. (CO 5)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23EC381.1	Differentiate between signal diodes, rectifiers, and Zener diodes based on their characteristics and applications.
U23EC381.2	Analyze BJT and FET symbol representations, internal structures, and biasing circuits.
U23EC381.3	Comprehend the architecture, instruction set and write assembly program for 8085 Microprocessor
U23EC381.4	Comprehend the architecture, instruction set and write assembly program for 8051Microcontroller
U23EC381.5	Interpret the working of peripherals and interface with 8051.

U23GE351	Engineering Practices Laboratory	L	T	P	J	C
		0	0	2	0	1

1. Course Description:

The course encompasses a comprehensive set of practical units aimed at providing hands-on experience in Computer Science, Mechanical, Electrical and Electronics Engineering fields.

Computer Science and Engineering Practices:

The students will be engaged in Computer assembly and disassembly, honing troubleshooting skills for both hardware and software issues.

Mechanical Engineering Practices:

Chairman, Board of Studies

Department of Computer Science and Business Systems
Sri Eshwar College of Engineering (Autonomous)
Kinathukadavu, Coimbatore - 641202.

The students will be delving into Mechanical Engineering practices which include plumbing, basic machining operations and rapid prototyping with 3D printing. The exploration extends to the assembly of a centrifugal pump, hands-on exercises involving pump/motor, submersible pump sets and refrigeration & air-conditioning systems.

Electrical Engineering Practices:

The students will be focusing on Electrical Engineering practices which involve UPS connections, domestic wiring, safety precautions and the design of solar PV systems.

Electronics Engineering Practices:

The students will be focusing on Electronics Engineering practices which include soldering techniques, a study of smartphone components and practical projects in home automation. Through this multifaceted course, students gain a well-rounded understanding of essential skills in Computer Science, Mechanical, Electrical & Electronics preparing them for diverse applications in those fields.

2. Course Objectives:

1. To impart knowledge on computer assembling, disassembling and troubleshooting.
2. To provide exposure to the students with rapid prototyping with 3D printing and plumbing operations.
3. To gain practical experience in UPS connections, domestic house wiring and solar PV systems.
4. To expose the students to understanding home automation, smartphone operation and soldering and desoldering techniques.

3. Syllabus:

30 Periods

Unit-I: Computer Science and Engineering Practices

(7)

1. Troubleshooting Desktops and PCs
2. Disassembly and Assembly of Desktops and PCs
3. Setting up Basic Computer Networks
4. Demonstration of AR/VR Technologies and Their Applications in Engineering Design, Simulation, and Training

Unit-II: Mechanical Engineering Practices

(8)

1. Hands-on exercise on plumbing connection of a residential building involving minor troubleshooting
2. 3D Printing of simple engineering objects without a support structure
3. 3D Printing of simple engineering objects with support structure
4. Hands-on exercise on basic connections and maintenance with minor troubleshooting of Refrigeration System (Study)

Unit-III: Electrical Engineering Practices

(7)

1. UPS Connection - Hands-on exercise on basic electrical connections with UPS Connection
2. Domestic Wiring - Hands-on exercise on basic domestic wiring
3. Safety Precautions - Hands-on exercise on electrical earthing and safety precautions
4. Renewable Energy - Design of Solar PV System for Residence (Study)

Unit-IV: Electronics Engineering Practices

(8)

1. Manual soldering of electronic components onto PCB
2. Analyse Smartphone component integration, design choices and their effects on performance.
3. Design and Building of Simple Home Automation System

 Chairman - Board of Studies
 Department of Computer Science and Business Systems
 Sri Eshwar College of Engineering (Autonomous)
 Kinathukadavu, Coimbatore - 641202.

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23GE351.1	Perform the basic troubleshooting of the PC including assembly and disassembly.
U23GE351.2	Carry out minor plumbing troubleshooting in a residential building & print 3D components with or without support materials.
U23GE351.3	Carry out minor troubleshooting and maintenance tasks in a Refrigeration System.
U23GE351.4	Perform basic domestic wiring of a residential building with provision of inverter and safety measures and Design solar PV System for residence.
U23GE351.5	Execute basic home automation projects.

U23CS351	Problem Solving using C Laboratory	L	T	P	J	C
		0	0	4	0	2

1. Course Description:

The Problem Solving Using C Laboratory is a practical course designed to complement theoretical knowledge with hands-on experience in programming using the C language. Through a series of laboratory sessions, students will delve into the basic concepts of C programming, including conditional and looping statements, modular programming, and advanced topics such as pointers, arrays, and structures. By actively engaging in coding exercises and projects, students will develop problem-solving skills, algorithmic thinking, and proficiency in implementing efficient solutions to various computational problems.

2. Course Objectives:

1. Instruct students on developing robust, readable, and maintainable code for a variety of applications.
2. Teach students to effectively use control structures and functions to manage program flow, make decisions, and automate repetitive tasks.
3. Enhance students' ability to optimize memory usage and promote code reusability in their programs.
4. Guide students in organizing and processing data efficiently, enabling them to write clean, structured code that addresses real-world problems.
5. Train students in working proficiently with strings, user-defined data types, and file operations.

3. List of Experiments:

60 Periods

1. Develop flow charts and solve simple real-life or scientific or technical problems (Traffic signal control / Water level controller / Temperature control system / Automatic washing machine control system / Automatic Street light control system / Electricity Billing / Retail shop billing / Computing Electrical Current in Three Phase AC circuits) (Minimum 3 problems) (CO1)
2. Implementation of applications of input and output statements. (Integer, char, Float, string input and output, ASCII value of character, User details) (CO1)
3. Implementation operators and expressions (Centigrade to Fahrenheit, Quotient and Remainder, Kilometres per hour to miles per hour, Hour and Minutes, Profit Calculator) (CO1)
4. Implementation of real-time applications using conditional statements. (Vowel or Consonant, Eligible for casting vote, Leap year or not, Display the description for the given grade, Display number of days in a month, Calculator, Triangle type, Roots of a quadratic equation) (CO1)

5. Implementation of technical applications using iterative loops (Display first N natural numbers, Read N numbers and find their sum and average, find cube of the number up to a given integer, Multiplication table, Sum of N natural numbers, Sum of N natural odd numbers, Pattern printing) (CO2)
6. Implementation of the one-dimensional array (Display the array elements, Elements in reverse order, Sum of array elements, make a copy of array elements, Maximum and minimum, odd sum and even sum) (CO2)
7. Implementation of a two-dimensional and multi-dimensional array (sum, subtraction, transpose, multiplication, frequency of even numbers, print diagonals, sum of diagonal elements, compare) (CO2)
8. Implementation of Functions in the program (Factorial, largest number, area of shape, sum of digits, prime number or not) (CO2)
9. Implementation of real-time applications using recursion (factorial, Fibonacci series, count digits of a number, length of string, prime or not, GCD, sum of all digits, palindrome) (CO2)
10. Implementation of a pointer in applications (swap two numbers, print string, read array elements, double pointer, find the maximum number, palindrome, reverse array, dynamic memory allocation) (CO3)
11. Implementation of strings handling functions with and without library functions (compare two strings, reverse, concatenate, copy, palindrome, count number of characters, number of words, find, replace) (CO4)
12. Implementation of file-handling operations (read, write, append file, compare two files, read student details and store into files) (CO4)
13. Implementations of Structure in real-time applications (Accept & display employee details, Calculate total payment of workers, Library operations, Menu-driven program for employee structure) (CO5)
14. Implementations of Union in programs (Accept & display employee details, Calculate total payment of workers, Library operations, Menu-driven program for employee structure) (CO5)
15. Mini Project: Develop an application for any real-world problem

Chairman – Board of Studies
 Department of Computer Science and Business Systems
 Sri Eshwar College of Engineering (Autonomous)
 Kinathukadavu, Coimbatore - 641202.

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS351.1	Design solutions for real-world problems with programming constructs
U23CS351.2	Solve complex programming problems with arrays and functions
U23CS351.3	Implement dynamic memory addressing techniques with Pointers
U23CS351.4	Implement various error-handling techniques for file operations
U23CS351.5	Implement complex data structures such as structures and unions in C to manage and organize data effectively

U23EM751	Soft Skills	L	T	P	J	C
		0	0	2	0	1

1. Course Description:

This course on Soft Skills is designed to enhance the professional development of engineering students by refining essential interpersonal and communication skills. It focuses on cultivating critical attributes such as effective communication, active listening, teamwork, leadership, and time management. The course also emphasizes the importance of professional etiquette, advanced communication techniques, technical writing, and the ability to navigate formal and informal contexts. By integrating these elements, students will develop the competencies necessary for successful collaboration, decision-making, and professional growth in the engineering field.

2. Course Objectives:

1. Develop foundational language skills by reinforcing key communication principles.
2. Instill positive behavioural traits to prepare students for future interactions in the corporate environment.
3. Equip students with the knowledge and skills needed to communicate ideas on social issues, promoting a sense of responsibility and active citizenship.
4. Enhance leadership abilities, teamwork strategies, and the capacity to foster effective connections through impactful communication.
5. Strengthen confidence and public speaking skills by offering experiential learning and techniques to overcome presentation anxiety and communicate effectively in front of an audience.

3. Syllabus:

30 Periods

Unit-I: Personality and Professional Development Skills

(6)

Interpersonal skills: communication skills, active listening, teamwork, empathy, leadership, motivation, social skills – effective body language – workplace etiquette – types of speeches: memorized speech, manuscript speech, impromptu, and extempore.

Unit-II: Advanced Communication Skills

(6)

Word and sentence stress – clear individual sounds – intonation patterns – pronunciation – mother tongue intrusion – tongue twisters - conversation practice: discourse markers, slang, colloquial expressions, collocation - making mini presentations – extending on conversations – collaborative task.

Unit-III: Effective Communication Skills

(6)

Verbal and non-verbal communication - formal and informal English – grammatical features: impersonal passives, nominal compounds, third persons, empty verbs, present tense, imperatives, active voice, jargon, cliches – presentation skills - resume preparation - group discussions – mock interviews.

Unit-IV: Team Skills And Interpersonal Communication

Chairman (6) Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore 26641202.

Personal skills: time management, motivating others, assessing alternatives and making decisions, accurate written work, organisational skills, attention to detail, negotiation and mediation skills – public speaking - panel discussion – debates

Unit-V: Engineering Journalism (6)

Technical writing style: accuracy, conciseness, clarity, objectivity – abstract writing – technical documents writing - blogs - editing - copyrights - plagiarism

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23EM751.1	Understand and apply interpersonal skills to enhance professional interactions and goal-setting.
U23EM751.2	Demonstrate clear and effective communication in reports and presentations to showcase professional skills.
U23EM751.3	Utilize advanced communication techniques to improve verbal and written effectiveness.
U23EM751.4	Analyze team dynamics and personal skills to enhance individual and group performance.
U23EM751.5	Create accurate and concise technical documents to uphold high standards in engineering journalism

 Kinathukadavu, Coimbatore - 641202.

U23MC901	தமிழர் மரபு / Heritage of Tamils	L	T	P	J	C
		1	0	0	0	1

1. Course Description / பாடநெறி விளக்கம்:

This course is taught to provide insight to the students into the rich culture and heritage of the state. The students should know the valued things such as historic buildings that have been passed down from previous generations and relating to things of Tamil historical and cultural value that are worthy of preservation. This course explains the growth of nationalism, the growth of the Tamil language, various religious reformers, the spread of the Dravidian movement and its possible impact on society, the role of the self-respect movement, educational development in Tamilnadu since independence and the growth of fine arts in Tamilnadu.

மாநிலத்தின் வளமான கலாச்சாரம் மற்றும் பாரம்பரியம் பற்றிய நுண்ணறிவை மாணவர்களுக்கு வழங்க இந்த பாடநெறி கற்பிக்கப்படுகிறது. முந்தைய தலைமுறையினரிடமிருந்து பெறப்பட்ட வரலாற்று கட்டிடங்கள் மற்றும் தமிழ் வரலாற்று மற்றும் கலாச்சார மதிப்புள்ள விஷயங்கள் பாதுகாக்கப்பட வேண்டிய மதிப்புமிக்க விஷயங்களை மாணவர்கள் அறிந்து கொள்ள வேண்டும். தமிழ்நாட்டின் தேசியத்தின் வளர்ச்சி, தமிழ் மொழியின் வளர்ச்சி, பல்வேறு சமய சீர்திருத்தவாதிகள், திராவிட இயக்கத்தின் பரவல் மற்றும் சமுதாயத்தில் அதன் தாக்கம், சுயமரியாதை இயக்கத்தின் பங்கு, சுதந்திரத்திற்குப் பிறகு தமிழகத்தில் கல்வி வளர்ச்சி மற்றும் தமிழகத்தில் நுண்கலைகளின் வளர்ச்சி பற்றி இந்த பாடநெறி விளக்குகிறது.

2. Course Objectives / பாடத்தின் நோக்கங்கள் :

1. To make an inference about language and traditional of the state.

மாநிலத்தின் மொழி மற்றும் பாரம்பரியம் பற்றி அனுமானிக்க உதவுகிறது.

2. To acquire knowledge in construction of status and various musical instruments

கட்டிடக்கலை மற்றும் பல்வேறு இசைக்கருவிகளை உருவாக்குவதற்கான அறிவைப் பெறுதல்.

3. To study the detailed information about folklore and paramilitary arts.

நாட்டுப்புறவியல் மற்றும் ராணுவக் கலைகள் பற்றிய விரிவான தகவல்களைப் படிக்க உதவுகிறது.

4. To gain knowledge of rich culture and success history of ancient kingdoms.

பண்டைய ராஜ்யங்களின் வளமான கலாச்சாரம் மற்றும் வெற்றி வரலாற்றைப் பற்றிய அறிவைப் பெற உதவுகிறது.

5. To acquaint the student with the knowledge of Siddha medicine and about the Indian freedom struggle.

சித்த மருத்துவம் மற்றும் இந்திய சுதந்திரப் போராட்டம் பற்றிய அறிவை மாணவருக்கு அறிமுகப்படுத்துதல்.

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 641202.

<p>3. Syllabus / பாடத்திட்டங்கள்:</p>	<p>15 Periods</p>
<p>Unit-I / அலகு-I: Language And Literature / மொழி மற்றும் இலக்கியம் (3)</p>	<p>Language Families in India – Dravidian Languages – Tamil as a Classical Language – Classical Literature in Tamil – Secular Nature of Sangam Literature – Distributive Justice in Sangam Literature – Management Principles in Thirukkural – Tamil Epics and Impact of Buddhism & Jainism in Tamil Land – Bakthi Literature Azhwars and Nayanmars – Forms of minor Poetry – Development of Modern literature in Tamil – Contribution of Bharathiyar and Bharathidhasan.</p> <p>இந்திய மொழி குடும்பங்கள் - திராவிட மொழிகள் - தமிழ் ஒரு செம்மொழி - தமிழ் செவ்விலக்கியங்கள் - சங்க இலக்கியத்தின் சமயச் சார்பற்ற தன்மை - சங்க இலக்கியத்தில் பகிர்தல் அறம் - திருக்குறளில் மேலாண்மைக் கருத்துகள் - தமிழ்க் காப்பியங்கள், தமிழகத்தில் சமண பௌத்த சமயங்களின் தாக்கம் - பக்தி இலக்கியம், ஆழ்வார்கள் மற்றும் நாயன்மார்கள் - சிற்றிலக்கியங்கள் - தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி - தமிழிலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.</p>
<p>Unit-II / அலகு - II: Heritage–Rock Art Paintings to Modern Art –Sculpture / மரபு - பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை - சிற்பக்கலை (3)</p>	<p>Hero stone to modern sculpture – Bronze icons – Tribes and their handicrafts – Art of temple car making – Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments – Mridhangam, Parai, Veenai, Yazh and Nadhaswaram – Role of Temples in Social and Economic Life of Tamils.</p> <p>நடுக்கல் முதல் நவீன சிற்பங்கள் வரை - ஐம்பொன் சிலைகள் - பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினை பொருள்கள், பொம்மைகள் - தேர் செய்யும் கலை - சுடுமண் சிற்பங்கள் - நாட்டுப்புறத் தெய்வங்கள் - குமரி முனையில் திருவள்ளூவர் சிலை - இசைக் கருவிகள் - மிருதங்கம், பறை, யாழ், வீணை, நாதஸ்வரம் - தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு</p>
<p>Unit-III / அலகு-III: Folk and Martial Arts / நாட்டுப்புறக் கலைகள் மற்றும் வீர விளையாட்டுகள் (3)</p>	<p>Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leather puppetry, Silambattam, Valari, Tiger dance – Sports and Games of Tamils.</p> <p>தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஓயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம் - தமிழர்களின் வீர விளையாட்டுகள்.</p>
<p>Unit-IV / அலகு-IV: Thinai Concept of Tamils / தமிழர்களின் திணைக்கோட்பாடுகள் (3)</p>	<p>Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature – Aram Concept of Tamils – Education and Literacy during Sangam Age – Ancient Cities and Ports of Sangam Age – Export and Import during Sangam Age – Overseas Conquest of Cholas.</p> <p>தமிழகத்தின் தாவரங்களும், விலங்குகளும் - தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள் - தமிழர்கள்</p>

போற்றிய அறக்கோட்பாடு - சங்க காலத்தில் தமிழகத்தில் எழுத்தறிவும், கல்வியும் - சங்க கால நகரங்களும் துறை முகங்களும் - சங்க காலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி - கடல் கடந்த நாடுகளில் சோழர்களின் வெற்றி.

Unit-V/ அலகு-V: Contribution Of Tamils To Indian National Movement and Indian Culture / இந்திய தேசிய இயக்கம் மற்றும் இந்திய பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு (3)

Contribution of Tamils to Indian Freedom Struggle – The Cultural Influence of Tamils over the other parts of India – Self-Respect Movement – Role of Siddha Medicine in Indigenous Systems of Medicine – Inscriptions & Manuscripts – Print History of Tamil Books.

இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு - இந்தியாவின் பிற்ப்பகுதியில் தமிழ்ப் பண்பாட்டின் தாக்கம் - சுய மரியாதை இயக்கம் - இந்திய மருத்துவத்தில், சித்த மருத்துவத்தின் பங்கு - கல்வெட்டுகள், கையெழுத்துப்படிக்கல்கள் - தமிழ்ப் புத்தகங்களின் அச்சு வரலாறு.

Text Books:

1. தமிழக வரலாறு - மக்களும் பயன்பாடுகளும் - கே கே பிள்ளை (தமிழக பாட நூல் கழகம் மற்றும் கல்வியல் பணிகள் கழகம்).
2. கணினித் தமிழ் - முனைவர் இல .சுந்தரம் (விகடன் பிரசுரம்).
3. கீழடி - வைகை நதிக்கரையில் சங்க கால நகர நாகரிகம் (தொல்லியல் துறை வெளியீடு).
4. பொருறை -ஆற்றங்கரை நாகரிகம் (தொல்லியல் துறை வெளியீடு).
5. Social Life of Tamils - Dr.K.K.Pillay, A joint publication of TNTB & ESC and RMRL – (in print).
6. Social Life of the Tamils - The Classical Period - Dr.S.Singaravelu (Published by: International Institute of Tamil Studies).
7. Historical Heritage of the Tamils - Dr. S. V. Subatamanian, Dr. K. D. Thirunavukkarasu (Published by: International Institute of Tamil Studies).
8. The Contributions of the Tamils to Indian Culture - Dr.M.Valarmathi (Published by: International Institute of Tamil Studies).
9. Keeladi - 'Sangam City Civilization on the banks of river Vaigai' (Jointly published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation Tamil Nadu).
10. Studies in the History of India with Special Reference to Tamil Nadu - Dr.K.K.Pillay.

References:

1. Journey of Civilization Indus to Vaigai - R. Balakrishnan, Published by: RMRL.
2. Porunai Civilization (Jointly Published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation, Tamil Nadu)

4. Course Outcomes/ பாடநெறி முடிவுகள்:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome / பாடநெறி முடிவுகள்
U23MC901.1	To know about the language families in India, the impact of the religions, and the contribution of Bharathiar and Bharathidhasan.

	இந்தியாவில் உள்ள மொழி குடும்பங்கள், மதங்களின் தாக்கம், பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு பற்றி தெரிந்து கொள்வது.
U23MC901.2	Observe the growth of sculpture making of musical instruments and the role of temples in socio and economic lives. தமிழர்களின் வாழ்வில் இசைக்கருவிகள், சிற்பங்களை உருவாக்கும் முறைகள், சமூக, பொருளாதார வளர்ச்சி மற்றும் கோவில்களின் பங்களிப்பு பற்றி அறிந்து கொள்வது
U23MC901.3	Understand the significance of folklore and martial arts. நாட்டுப்புறவியல் மற்றும் தற்காப்புக் கலைகளின் முக்கியத்துவத்தைப் புரிந்து கொள்வது.
U23MC901.4	Learn the Sangam literature, Sangam age and overseas conquest of Cholas. சங்க இலக்கியம், சங்க காலம் மற்றும் சோழர்களின் வெற்றிகள் ஆகியவற்றைக் கற்றுக்கொள்வது.
U23MC901.5	Understand the contribution of Tamils to the Indian freedom struggle and the role of Siddha medicines. இந்திய சுதந்திரப் போராட்டத்தில் தமிழர்களின் பங்களிப்பு, சித்த மருந்துகளின் பங்கு ஆகியவற்றைப் புரிந்து கொள்வது.

SEMESTER II

U23MA210	Probability and Descriptive Statistics	L	T	P	J	C
		3	1	0	0	4
1. Course Description:						
Probability and Descriptive Statistics is an introductory course designed to provide students with a foundational understanding of probability theory and descriptive statistics. Probability theory is the mathematical framework used to quantify uncertainty and randomness, while descriptive statistics involves the analysis and presentation of data to describe and summarize its key features. This course covers basic concepts in probability, including sample spaces, events, probability distributions, random variables, and probability models, as well as fundamental techniques in descriptive statistics, such as measures of central tendency, dispersion, and graphical representation of data.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Familiarize the students on outcomes of random occurrences. 2. Enhance the knowledge in various distributions and its applications. 3. Impart the knowledge of correlation and regression and interpret the linear regression equation. 4. Equip the students on methods for collecting data and calculate central tendency, dispersion. 5. Inculcate knowledge on control charts and acceptance sampling techniques to ensure quality. 						
3. Syllabus:		45+15 =60 Periods				
Unit-I: Random Variables		(9+3)				
Probability axioms; Conditional probability; Baye's theorem statement only; discrete and continuous random variables; Moments, moment generating functions.						
Unit-II: Standard Probability Distributions		(9+3)				

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 641202.

Discrete distributions: Binomial distribution, Poisson distribution, geometric distribution; Continuous distributions: Uniform distribution, exponential distribution, normal distribution.
Unit-III: Two Dimensional Discrete Random Variables (9+3)
Joint probability distributions; Marginal and conditional distributions; Covariance.
Unit-IV: Introduction to Statistics (9+3)
Definition of statistics; Basic objectives; Collection of data: Internal and external data, primary and secondary data; Population and sample; Representative sample; Descriptive statistics: Classification, tabulation of univariate data; Descriptive measures: Central tendency, mean, median and mode; Dispersion: Range, quartile deviation, standard deviation.
Unit-V: Statistical Quality Control (9+3)
Control charts for measurements X and R charts; Control charts for attributes p, c and np charts; Tolerance limits; Acceptance sampling.
List of Tutorials:
<ol style="list-style-type: none"> 1. Introduction: Understanding data types; importing/exporting data. (CO 1) 2. Implementation of probability distributions: binomial Distribution, Poisson distribution, exponential distribution, normal distribution. (CO 2) 3. Applying covariance to real dataset. (CO 3) 4. Implementation of various statistical measures like mean, median, mode, range, standard deviation, quartile deviation. (CO 4) 5. Implementation of X-chart, R-charts, P-charts, C-charts and np-charts. (CO 5)
Text Books:

 Sri Eshwar College of Engineering (Autonomous)
 Kinathukadavu, Coimbatore - 641202.

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23MA210.1	Formulate and solve problems involving random variables.
U23MA210.2	Analyze the basic concepts of random variables and find an appropriate distribution for an experiment.
U23MA210.3	Apply statistical methods like correlation, regression analysis in analyzing, interpreting experimental data.
U23MA210.4	Compute the various measures of central tendency and dispersion for ungrouped and grouped data.
U23MA210.5	Evaluate and implement various quality control strategies in different industries to improve policies and product quality.

U23CS401	Data Structures	L	T	P	J	C
		3	0	0	0	3
1. Course Description:						
<p>This course provides a comprehensive introduction to data structures. Students will delve into the principles behind organizing and manipulating data efficiently, covering a wide array of topics including lists, stacks, queues, sorting algorithms, searching techniques, hashing, trees, and graphs. Through a combination of theoretical lectures, practical coding exercises, and real-world applications, students will gain a solid understanding of how to select and implement the appropriate data structures and algorithms to solve complex computational problems.</p>						
2. Course Objectives:						
<ol style="list-style-type: none"> To build and work with linear and nonlinear data structures like arrays, linked lists, stacks, queues, trees, and graphs. To discover data structures to solve real-world problems and scenarios, demonstrating an understanding of trade-offs and limitations To equip students with skills in designing, implementing, and analysing tree-based solutions to complex problems To familiarize and work with algorithms, including traversal, shortest paths, and network flow, to solve complex problems To implement and analyse sorting, searching, and hashing techniques to optimize data retrieval and manipulation in various contexts 						
3. Syllabus:						45 periods
Unit-I: Linked Lists						(9)
Arrays vs Linked list; Linked lists: types, singly linked list, doubly linked list, singly circular linked list, doubly circular linked list, operations, insertion, deletion, find, reverse, modifying linked list; Floyd's cycle finding algorithm: slow pointer and fast pointer						
Unit-II: Stacks and Queue						(9)
Stack: implementation using array and linked list, Operations: push, pop; Applications: infix to postfix conversion, processing function calls; Queue: implementation using array and linked list, enqueue, dequeue, priority queue, circular queue; Applications: call log management						
Unit-III: Trees						

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 571202.

Terminologies; Binary Trees: implementation, traversals, expression trees, cousins of a binary tree; Binary Search Trees: construction, insertion, deletion, searching, find-min, find-max; AVL Trees: insertion, deletion; Priority Queues: heaps; Applications: dictionary, text processing
Unit-IV: Graphs (9)
Representation; Types; Traversals: Depth First Search (DFS), Breadth First Search (BFS); Dijkstra's algorithm; Topological sort; Minimum Spanning Tree (MST): Prim's, Kruskal's algorithm; Applications: traffic redirection problem, travelling salesman problem
Unit-V: Sorting, Searching and Hashing (9)
Internal sorting: bubble, insertion, quick; External sorting: merge sort; Searching: linear search, binary search; Hashing: hash table, hash functions, collision resolution techniques; Applications: Telephone Directories, Spell Checker, Design of Game Boards

U23CS402	Object Oriented Programming using C++	L	T	P	J	C
		3	0	0	0	3
1. Course Description:						
This course serves as an intensive exploration of the principles and practices of object-oriented programming (OOP) using the C++ programming language. Students will embark on a journey through the core concepts of OOP, including classes and objects, inheritance, polymorphism, and dynamic memory allocation. Additionally, the course will delve into advanced topics such as the Standard Template Library (STL), lambda expressions, and concurrency. Through hands-on coding exercises, projects, and real-world examples, students will gain a solid understanding of how to design, implement, and maintain object-oriented C++ programs efficiently.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Teach students the foundational principles of C++ programming. 2. Instruct students on the core concepts of Object-Oriented Programming (OOP) in C++. 3. Guide students in understanding and applying inheritance and polymorphism in C++. 4. Enable students to implement common data structures and containers using C++. 5. Train students in developing concurrent applications using C++. 						
3. Syllabus:						45 periods
Unit-I: Foundations of C++						(9)
Introduction to C++: features, identifiers, data types, namespace, keywords, operators, input & output, streams, control statements; arrays; strings; functions: inline functions, default arguments; references & pointers; dynamic memory management						
Unit-II: Classes and Objects						(9)
OOP Mechanisms: classes and objects, access specifiers, constructors, destructors & object lifetime, copy constructor & copy assignment operator; static members; structs & enumeration; friend function & friend class						
Unit-III: Inheritance and Polymorphism						(9)
Inheritance & its types; aggregation; abstract classes; polymorphism: static and dynamic binding, virtual function table, function overloading, operator overloading; type casting: cast operators						
Unit-IV: Standard Template Libraries						(9)
STL: components: containers, algorithms, functions, iterators; containers: array, vector, deque, list, forward list, stack, queue, set, multiset map, multimap, unordered set, unordered multiset, unordered map, unordered multimap; file handling						
Unit-V: Lambda and Concurrency						(9)
Exception & its types; concurrency: atomic, thread, mutex; lambda in C++; resource management by smart pointers; C++ series: rvalue, lvalue & perfect forwarding; templates in C++ : features & types						
Text Books:

2. https://onlinecourses.nptel.ac.in/noc23_cs78/course
3. https://onlinecourses.nptel.ac.in/noc21_cs02/preview

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS402.1	Demonstrate problem-solving skills by writing C++ programs for simple applications
U23CS402.2	Design and implement simple classes with attributes, methods and appropriate access modifiers
U23CS402.3	Illustrate the concepts of inheritance and polymorphism in real-time objects
U23CS402.4	Evaluate and choose the appropriate STL (vectors, lists, maps, etc.) for real-time applications
U23CS402.5	Apply the modern concepts of C++ in real-time concurrent processing

U23NCC01	NCC Credit Course Level I	L	T	P	J	C
		2	0	0	0	2
1. Course Description:						
The NCC Course is designed to instil discipline, leadership, and a sense of social responsibility in participants. Through a blend of theory and practical activities, students learn to respect cultural diversity, manage time effectively, and handle stress efficiently. They develop teamwork skills and engage in social service initiatives, fostering a well-rounded approach to personal and community development.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Provide a comprehensive understanding of the NCC's structure and objectives. 2. Foster national integration and the NCC's role in nation-building. 3. Develop leadership and personality development skills. 4. Encourage active participation in social service and community development. 5. Enhance awareness of safety protocols and key government initiatives. 						
3. Syllabus:						30 Periods
Unit-I: NCC General						(5)
Aims, Objectives & Organization of NCC - Incentives - Duties of NCC Cadet - NCC Camps: Types & Conduct						
Unit-II: National Integration and Awareness						(5)
National Integration: Importance & Necessity - Factors Affecting National Integration - Unity in Diversity & Role of NCC in Nation Building - Threats to National Security						
Unit-III: Personality Development						(6)
Self-awareness, Empathy, Critical & Creative Thinking, Decision-making and Problem-Solving - Communication Skills - Group Discussion: Stress & Emotions, Time Management, Team Work – Career Counseling, SSB Procedure & Interview Skills – Public Speaking						
Unit-IV: Leadership						(7)
Traits, Indicators, Motivation, Moral Values, Honour code - Case Studies: Shivaji, Jhansi Ki Rani, APJ Abdul Kalam, Tippu Sultan, Rabindranath Tagore, Ratan Tata						
Unit-V: Social Service and Community Development						(7)
Basics - Rural Development Programmes, NGOs, Contribution of Youth – Swachh Bharat Abhiyan – Drug Abuse, Tree Plantation Traffic Awareness, Digital Awareness, Beti Padhao,						

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 643602.

Beti Bachao, Women Health & Sanitation - Protection of Children and Women Safety - Road / Rail Travel Safety - New Initiatives - Cyber and Mobile Security Awareness
Text Book:
1. National Cadet Corps “Cadets Hand Book – Army(Common Subjects)”
Web Reference:
1. https://indiancc.nic.in/

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23NCC01.1	Demonstrate the conduct of NCC cadets, exhibiting discipline and leadership qualities, respect and appreciate the diversity of Indian culture, and fostering a sense of unity amidst differences.
U23NCC01.2	Conduct a comprehensive SWOT analysis to identify personal strengths and weaknesses, and implement strategies to overcome weaknesses, enhancing overall performance.
U23NCC01.3	Utilize various strategies for stress management, ensuring mental well-being and resilience in challenging situations
U23NCC01.4	Collaborate effectively within a team, demonstrating teamwork skills to achieve common objectives.
U23NCC01.5	Engage in social service activities on different occasions, contributing positively to the community and fostering a sense of social responsibility

U23HS582	Corporate Communication and Life Skills	L	T	P	J	C
		2	0	2	0	3

1. Course Description:						
This course explores the art of effective corporate communication while honing essential life skills for personal and professional growth and develops strategies for impactful interactions, interpersonal effectiveness, and holistic life management.						
2. Course Objectives:						
<ol style="list-style-type: none"> To understand the basic vocabulary, speed reading techniques – Skimming and Scanning. To analyze personality traits and team player style. To experience diversity and to organize concepts and present them effectively. To identify individual personality types and self analysis. To inculcate the habit of reading and writing leading to effective and efficient communication. 						
3. Syllabus: 30+30=60 Periods						
Unit-I: Reading and Writing Skills						(6)
Synonyms, Antonyms; Reading skills; Identifying relationship between characters, facts and ideas, comparing facts and figures; Understanding speed reading techniques; Descriptions; Skimming and Scanning; Application of reading and writing skills; Reading Comprehension; short texts from journals						
Unit-II: Team Player Skills						(6)
Analyzing personality traits; team player style; Understanding the concepts of Morality ; Diversity and Inclusion; Application of these concepts; Modal Verbs; Single word substitutes; Group Discussion; Narrating academic milestones						
Unit-III: Communication Techniques						(6)

Creation of Communication Material; Experiencing diversity; Assimilation of concepts and present them effectively; Easily confused phrases; Memo, Circular, Notice, Agenda, Minutes of Meeting; Organizing events to support inclusion; Conditional Sentences; Phrasal Verbs

Unit-IV: Self – Awareness

(6)

Self - Assessment, Self - Appraisal, SWOT, Goal setting - Personal & Career, Perceptions and Attitudes - Positive Attitude; Values and Belief Systems, Self-Esteem, Self - appraisal, Personal Goal setting, Career Planning, Personal success factors, Handling failure, Stress, Depression and Addiction, relating SWOT analysis & goal setting, and prioritization; Idioms, Degrees of Comparison, Check List

Unit-V: Corporate / Business Etiquettes

(6)

Corporate grooming and importance of first impression, Etiquettes in social and office Setting, Understand and Implement etiquettes in workplace, Presenting oneself with fineness; Introduction to Ethics in engineering and ethical reasoning, rights and responsibilities; Advertisement, Role Play, Direct and Indirect Speech.

List of Exercises:

30 Periods

1. Reading Comprehension Practice with Short Texts from Journals.(CO 1)
2. Group Discussion on Morality, Diversity, and Inclusion. (CO 2)
3. Narrating Academic Milestones Using Single Word Substitutes. (CO 2)
4. Creating Effective Communication Materials. (CO 3)
5. Organizing and Conducting Meetings: Agenda and Minutes Preparation. (CO 3)
6. Role-play: Simulating Events to Support Inclusion. (CO 3)
7. Handling Stress and Building Positive Attitudes: Case Studies and Role-play. (CO 4)
8. Corporate Grooming: Presenting Yourself Professionally. (CO 5)
9. Role-Playing Corporate and Social Etiquettes in Workplace Scenarios. (CO 5)
10. Introduction to Ethics in Engineering: Group Discussion and Case Studies. (CO 5)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23HS582.1	Develop advanced reading and writing skills, including skimming, scanning, and speed reading, to effectively analyze and comprehend texts.
U23HS582.2	Apply team dynamics, diversity, and inclusion principles, and enhance communication through group discussions and narrative exercises.
U23HS582.3	Construct effective communication materials, including memos and meeting agendas, and confidently use conditional sentences and phrasal verbs.
U23HS582.4	Analyze self-assessment and goal setting, develop a positive attitude, and handle stress and failure through self-awareness and SWOT analysis.
U23HS582.5	Interpret professional etiquette in social and office settings, and justify the ethical responsibilities in business environments through role-play and case studies.

U23HS501	Basic Japanese	L	T	P	J	C
		3	0	0	0	3

1. Course Description:

The primary objective of this course is to provide a solid foundation in speaking, listening, reading, and writing Japanese. Through interactive lessons and practical exercises, you'll learn essential vocabulary, grammar structures, and pronunciation. Additionally this course will introduce the various facets of the Japanese culture with cultural insights and real-life scenarios, thereby enhancing their awareness of the cultural subtleties inherent in the language.

2. Course Objectives:

1. Develop proficiency in basic Japanese language skills including speaking, listening, reading and writing to facilitate effective communication in everyday situations.
2. Acquire a solid understanding of the fundamental Japanese grammar structures, vocabularies and pronunciations to construct simple sentences and engage in basic conversations.
3. Enhance language proficiency through interactive activities, role-plays and real-life scenarios, fostering practical language usage and confidence in communication.
4. Build a foundation for further language study and cultural exploration, enabling the students to pursue advanced language proficiency and deeper cultural understanding.

3. Syllabus:

45 Periods

Unit-I: Introduction to Japanese Scripts and Basic Greetings

(9)

Japanese Scripts (Hiragana & Katakana) – Daily greetings and expressions – Introduction to grammar particles – N1 wa N2desu - N1 wa N2ja arimasen – Phrase/Sentence ka – N1 mo N2desu - N1 no N2desu – Honorific suffixes (san, kun, chan) – Demonstrative words (Ko, So, A & Do series) – Soudesu – Soudesuka – Soudesune – Sou ja arimasen/Chigaimasu – S1 ka S2 ka - N1(noun) wa N2(place)desu – Numbers – Days of the week – Days of the month

Unit-II: Introduction to Concept of Time	(9)
<p>Ji, fun, pun – Ima wa nan ji desuka – Introduction to verbs (group I, group II, group III verbs) – Verb tense forms – V masu – V mashita – V masen – V masendeshita – N(time) ni V - N1 kara N2made - N1 to N2– N to V – S ne – N(place) e ikimasu/kimasu/kaerimasu – Doko(e) mo ikimasen/ikimasendeshita – itsu – S yo - Introduction to de particle – N(place) de V – N(vehicle) de ikimasu/kimasu/kaerimasu – N(tool) de V – N o V(transitive) – N o Shimasu – Usage of nan and nani – V masenka – V mashou, mashouka – Honorific prefixes(o/go) – “word/sentence” wa ~go de nan desuka – N(person) ni agemasu/moraimasu/kuremasu – V mou mashita.</p>	
Unit-III: Introduction to Adjectives	(9)
<p>I ending adjectives – na ending adjectives – forms of adjectives(negative form, past form) – I ending adjective →ku/Na ending adjective→ni narimasu – degrees of adjectives – S1 ga S2 – N ga adjective – N ga arimasu/wakarimasu – degrees of adverbs – degrees of quantity – S1 kara S2 – Doushite – N1(place) ni N2(noun) ga arimasu – N1(noun) wa N2(place) ni arimasu/imasu – N1(noun) no N2(position) – N1 ya N2 nado.</p>	
Unit-IV: Introduction to Counters	(9)
<p>Counters for objects – Counters for person – Ikutsu – nan+counter suffix – kurai and gurai – Quantifier(period) ni frequency counter(kai) – Quantifier/Noun+dake - N1 wa N2 yori “adjective” desu - N1 to N2to Dochira ga “adjective” desuka – N no naka de nani/doko/dare/itsu ga “adjective” desuka – Interrogatives ka/mo/demo.</p>	
Unit-V: Verb Conjugations and their Usages	(9)
<p>5.1: V masu form and its usages N ga hoshii desu – V masu form tai desu – V masu form ni ikimasu/kimasu/kaerimasu – V masu form mashouka.</p> <p>5.2: V te form and its usages V te form kudasai – V te form imasu – V te form mo iidesu – V te form wa ikimasen – shirimasu, shirimasen, shitte imasu – te form of adjectives – V1 te form kara V2 – douyatte – V te form agemasu/kuremasu/moraimasu</p> <p>5.3: V nai form and its usages V nai form de kudasai – V nai form kereba narimasen – V nai form to – V nai form kutemo iidesu – N(time) madeni V.</p> <p>5.4: V dictionary form and its usages V dictionary form koto ga dekimasu – Shumi wa N suru/V dictionary form koto desu – N no/Quantifier(time)/V1 dictionary form maeni V2 – nakanaka – zehi/zettai/mochiron – V dictionary form jikan/youji/yakusoku.</p> <p>5.5: V ta form and its usages V ta form koto ga arimasu – V ta ri, V ta ri Shimasu – usage of plain form and polite form – kedo – noun modification using V plain form – V plain form/N no toki ~.</p> <p>5.6: If clause V dictionary form to~ - V ta form ra~ - V te form/I adj→kute/Na adj→de/N de mo~ - moshi/ikura~.</p>

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23HS501.1	Recognize and write the Japanese alphabet without errors
U23HS501.2	Extend the conversation using basic sounds in the Japanese language
U23HS501.3	Explain the concept of time by learning verbs, tenses and vocabularies.
U23HS501.4	Make use of the appropriate vocabulary required for simple conversations in the Japanese language.
U23HS501.5	Comprehend the conversation and give the correct meaning

U23HS502	Basic German	L	T	P	J	C
		3	0	0	0	3

1. Course Description:

This German language course offers a structured approach to learning German, spanning from basic introductions to more complex grammatical concepts and practical applications. Beginning with an introduction to German scripts and daily greetings, participants progress through units covering essential grammar topics, vocabulary expansion, and pronunciation exercises. Throughout the course, students engage in speaking activities, such as introducing themselves, ordering food, and describing their surroundings, while also focusing on listening comprehension and reading comprehension.

By the end of the course, participants will have gained proficiency in basic conversational German, acquired foundational knowledge of German grammar and vocabulary, and developed the skills necessary to navigate everyday situations in a German-speaking environment.

2. Course Objectives:

1. Basic German introduces learners to essential language components such as vocabulary, grammar, pronunciation, and basic conversational phrases.
2. Through interactive lessons and practical exercises, students develop the ability to communicate in basic German for everyday scenarios including greetings, introductions, shopping, dining, and navigating daily life situations.
3. Additionally, learners become familiar with the German alphabet, basic sentence structure, and common expressions, facilitating basic reading and writing skills.

3. Syllabus:

45 Periods

Unit-I: Basic Introduction to German Scripts

(9)

Theme and Text (Introduction to German - German script, Deutsche Namen, Daily Greetings and Expressions) – Grammar (‘wh’ questions, das Alphabet)– Speak Action (Buchstabieren, sich und andere vorstellen nach Namen und Herkunft fragen, internationale Wörter auf Deutsch verstehen, jemanden begrüßen)– pronunciation (Buchstabieren J,V,W,Y, - Long vowels A,E,I,O,U - Pronunciation of Ä,Ü,Ö) – To learn (internationale Wörter in Texten finden, Wörter sortieren)

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 641202.

Theme and Text (Gespräche im café, Getränkekarte, Telefonbuch, Namen, Rechnungen) – Grammar (Fragesätze mit wie, woher, wo, was Verben in präsens Singular und Plural, das Verb Sein, Personalpronomen und Verben)– Speak Action (eine Gespräch beginnen sich und andere vorstellen zählen, etwas bestellen und bezahlen Telefonnummern und verstehen)– pronunciation (Wortakzent in Verben und in Zahlen) – To learn (Grammatiktablette ergänzen, mit einem Redemittelkasten arbeiten)	
Unit-II: Numbers and Nominative Case	(9)
Theme and Text (Numbers – 1 to 12 (Eins bis Zwölf) – 20, 30, 40, 90 (zwanzig-Neunzig) – All Numbers (1-10000) – German Currency (Euro) – Basic Mathematics (plus, Minus, Malen, Geteilt durch)) – Grammar (Introduction of verbs –Have Verb – To Come, To Speak, To Read, To Drive, To Fly, To write, To Eat, To sleep, To take etc.,)	
Theme and Text (Communication in course) – Grammar (Singular and Plural, Artikel: der,das,die/ ein,eine, verneinung: kein, keine, Komposita: das Kursbuch) – Speak Action (Gegenständen fragen/ Gegenstände benennen im kurs:) – pronunciation (word accent Marking, Umlaute ö ä ü hören und sprechen) – To learn (Lernkarten schreiben, Memotipps, eine Regel selbst finden)	
Theme and Text (City, Town, Language: Nachbar, Sprachen, Sehenswürdigkeiten in Europa) – Grammar (Past tense for Sein, W-Frage, Aussagesatz und Satzfrage) – Speak Action (about city and siteseeing) – pronunciation (Satzakzent in Frage- und Aussagesätzen) – To learn (eine Regel ergänzen, eine Grammatiktablette erarbeiten, Notizen machen)	
Unit-III:Akkusative Case and Prepositions	(9)
Theme and Text (Menschen und Häuser, Furniture catalogue, E-Mail, House information) – Grammar (possesivartikel im Nominativ, Artikel im Akkusativ, Adjektive im satz, Graduierung mit zu)– Speak Action (Whonung beschreiben about perons and things)– pronunciation (consonant - ch) – To learn (wortschatz systematisch)	
Theme and Text (Termine - Appointment and punctuality in Germany) – Grammar (questions with wann?, Preposition (am, um, von... bis), verneinung mit nicht, trennbare verben, präteritum von haben) – Speak Action (Daily plan making, time commitment, excuse for late coming) – pronunciation (consonants- p,b,t,d / k,g) – To learn (Rollenkarten arbeiten)	
Theme and Text (orientation in the working area, go for work, floor plan city plan, office and computer) – Grammar (preposition: in,neben, unter, auf, vor, hinter, an, zwischen, bei und mit + Datic)– Speak Action (workplace, work, giving appointments)– pronunciation (consonants: f,w und v) – To learn (Making notice in the calendar)	
Unit-IV:Dativ Case and Prepositions	(9)
Theme and Text (Holiday and Party, holiday plan, party plan in Germany) – Grammar (regular and irregular verbs) – Speak Action (holiday speak, accident, Ich-Text schreiben) – pronunciation (lange und kurze vokale markieren) – To learn (Text Order)	
Theme and Text (organising an Excursion to Berlin through city orientation, Bus plan, City plan, postcard, Excursion programme) – Grammar (preposition: in, durch, über + Akkusativ: zu, an... vorbei + Dativ, Modalverb wollen) – Speak Action (Tourism, culture, postcard preparation, travel description) – pronunciation (r and l)– To learn (plaket making)	
Theme and Text (Beruf und all Tag, Visiten karten, wörterbuch) – Grammar – Speak Action (profession, statistic speaking) – pronunciation (n,ng and nk)– To learn (wörterbuch , text information in tabel)	
Unit-V: Adjectives and Pronunciation	(9)
Theme and Text (Haushaltstipp, kochrezept, maße und gewichte, Mahlzeiten und Gerichte) – Grammar (jeden Tag, manchmal, nie, Question - welche, Comparison – viel, gut, gern) – Speak Action (about eat, drink question and answers) – pronunciation (e,en,el,er) – To learn (Text auswerten und zusammenfassen)	

Theme and Text (Clothing, colour, weather) – Grammar (Adjective im Akkusativ, unbestimmter Artikel) – Speak Action (weather, dress and colour understanding) – pronunciation (e-o- ö and ie-u- ü) – To learn (wetter and Farben interkulturelle)

Theme and Text (in supermarket, purchase, House Maintenance, Emotions, Sports, Body parts) – Grammar (Modal Verb) – Speak Action (Body parts) – To learn (Rollenkarten arbeiten)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23HS502.1	Recognize and write the German alphabet
U23HS502.2	Speak using basic sounds of the German language
U23HS502.3	Apply appropriate vocabulary needed for simple conversation in the German language
U23HS502.4	Apply appropriate grammar to write and speak in the German language
U23HS502.5	Comprehend the conversation and give the correct meaning

U23CS381	Application Design and Development	L	T	P	J	C
		2	0	2	0	3

1. Course Description:

Application Design and Development is a comprehensive integrated course that blends theoretical understanding with practical hands-on experience in creating diverse applications. Students will delve into essential web development concepts using HTML, CSS, and JavaScript, mastering the foundations of building interactive and responsive web interfaces. Additionally, they will learn version control using Git and GitHub, enabling collaborative development and effective management of project iterations.

Furthermore, students will explore mobile application development using MIT App Inventor, gaming application development with Construct 2, and image/video editing using Blender tools. Through a combination of theoretical lectures, interactive labs, and project-based learning, students will gain the skills necessary to design, develop, and deploy various types of applications.

2. Course Objectives:

1. To design and build visually appealing and interactive web pages using HTML and CSS, creating a strong foundation for web development
2. To make students create dynamic and interactive web pages using JavaScript, enhancing user experience and adding functionality to web applications
3. To create and manage Git repositories and how to collaborate using GitHub, including forking, cloning, and pull requests
4. To develop mobile applications for Android devices using MIT App Inventor's visual blocks programming
5. To create 2D games using Construct 2 and edit multimedia content using Blender

3. Syllabus: (30+30 = 60 Periods)

Unit-I: HTML and CSS (6)

Software Development: SDLC (Waterfall Model)- Phases - Methods and Practices- Introduction to web- Standards and Terminologies. HTML: Introduction and versions-HTML 5-standards and tags-Head and Body-List-Labels-Tables-Forms-Videos and Audios-Figure, Figure Captions, Images CSS: Introduction-Embedded Types-CSS Selectors-Borders, Margins, Paddings-Colors and Backgrounds- Introduction to Bootstrap-Tailwind CSS

Unit-II: Interactive Web Design using JavaScript (6)

Introduction-Java Script adding Techniques-Variables and Operators- Conditional and Control Statements- Data Types and Functions-Events-Form Validation-Page Redirect-Java Script Exception Handling-Document Object Model (DOM)

Unit-III: Git, Git Hub and Shell Scripting (6)

Introduction to Git and GitHub-Terminologies-Local Repository Actions- Remote Repository Actions- Advanced Repository Actions-Branching-Merging-Software Developers Communities: Google Developers Group, Google Student Developers Community, Linux Developer Community, Stack Overflow, Kaggle Shell Scripting: Processing (PS) and Listing (LS)- File Creations and Handling-Users and Groups

Unit-IV: Mobile Application Development with MITAI (6)

Types of Mobile OS (Android and IOS)-Architecture- Phases of Mobile Application Development -MIT app inventor-Components-Viewer-Properties – Publishing an app

Unit-V: Template-Driven Applications and Multimedia (6)

Content Management System: Dynamic content flow - Collection fields – Search Engine Optimization, Multimedia: Design with Canva and Blender- Image and Video Editing –Game Development with Construct 2

List of Experiments: (30)

1. Develop a visually appealing static website with an intuitive user interface with multimedia content such as text, images and videos using HTML, CSS and JavaScript (CO1)
2. Create a simple form to collect the name, address, email ID and phone number from the user and use JavaScript to validate each field before submitting the form (CO1)
3. Create an interactive quiz that allows the user to select answers to multiple-choice questions. Use JavaScript to calculate the user's score and provide feedback based on their performance (CO1)
4. Create a simple animation using CSS and JavaScript. Use CSS to define the animation's properties, such as duration and timing and use JavaScript to trigger the animation in response to user input or other events (CO2)
5. Create a local repository using Git and perform basic operations such as initializing the repository, adding files, committing changes, and creating and managing multiple branches to organize and track changes (CO3)
6. Create a shell script that can automate file management tasks such as processing, listing, creation and handling of files and user and group management tasks (CO3)

7. Develop mobile applications using MITAI (Simple calculator, Step counter, a Weather app that retrieves current weather information from an API, Talk to Me, Translation App) (CO4)
 - a) Design a poster for an event using Canva templates (CO4)
 - b) Create a visual infographic using Canva tools to present data and information (CO4)
8. Develop a simple 2D game using a Construct visual interface and event system (CO4)
9. Model a 3D object using Blender modelling tools and techniques. Animate a short scene or character using Blender animation tools and a timeline (CO5)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS381.1	Utilize HTML5 and CSS to develop responsive web
U23CS381.2	Create Interactive web applications using JavaScript
U23CS381.3	Analyze and apply GIT and GIT HUB operations and advanced repository actions
U23CS381.4	Create mobile applications using the MIT app inventor
U23CS381.5	Create simple game applications using Construct

U23CS382	Python Programming	L	T	P	J	C
		2	0	2	2	4

1. Course Description:

This course covers the fundamental concepts and practical applications of Python programming. Students will explore topics ranging from basic data types and expressions to advanced data manipulation and visualization techniques. The course will delve into programming paradigms, emphasizing Python's versatility in supporting imperative, functional, and object-oriented programming styles. Through hands-on exercises, projects,

and real-world examples, students will develop a strong foundation in Python programming, enabling them to write efficient, readable, and maintainable code for various applications.	
2. Course Objectives:	
<ol style="list-style-type: none"> 1. To make students to write efficient, readable, and well-structured code 2. To choose and use data structures such as lists, tuples, dictionaries and sets in Python programs 3. To make students effectively organize, structure, and manage Python code using files, modules, and packages 4. To implement object-oriented programming constructs in Python 5. To use libraries for data analysis in Python and use Django framework for web application development 	
3. Syllabus:	30+30+30=90 periods
Unit-I: Python Constructs	(6)
Introduction: Python Interpreter and interactive mode, Comments, Identifiers and Keywords; Data Types; Variables and Expressions; Operators; Conditional Statements; Looping Statements; Fruitful Functions; Lambda Function Illustrative Programs: Financial application, sandwich vowel, and Chocolate Distribution Algorithm	
Unit-II: Lists, Tuples, Dictionaries and Set	(6)
Lists: operations - Processing Array elements, slices, methods, loop, mutability, aliasing, cloning, parameters, lists as arrays; Tuples: assignment, tuple as return value; Dictionaries: operations and methods; Sets: operations; Illustrative Programs: Dutch National Flag Algorithm, Count and Say Problem and Kadane's Algorithm	
Unit-III: Files, Modules and Packages	(6)
Files: text files, reading and writing files; Format Operator; Command Line Arguments; Error and Exception Handling; Modules; Packages; Locating path of modules – Python Date – Python Regex Illustrative Programs: Bank Management application using File concept	
Unit-IV: OOP and Databases	(6)
Object, class, constructor, inheritance, abstraction, polymorphism, encapsulation; MongoDB: Environmental Setup, creating new Database, CRUD Operations, Python DB connectivity Illustrative Programs: Event management using MongoDB, Real Estate management using MongoDB	
Unit-V: Data Analysis and Web Frameworks	(6)
NumPy: Basics of NumPy Arrays; Computations: Universal Functions; Aggregations: Min-Max and Everything in Between; Pandas: Objects, Data Indexing and Selection, Data Operations, Handling Missing Data; Matplotlib: Types of plots, Simple Line Plots, Boxplots, Simple Scatter Plots; Django: Overview, Introduction to MVC and MVT architecture in Web development, Django folder structure, generic views, HTML templates Illustrative Programs: Graph Plotting for performance Analysis, form design, webpage design	
List of Experiments ;	(30)
1. Create a Python application that uses expressions and control flow statements to automate a common task. Ensure that your application is user-friendly and robust to different inputs. (CO1)	

2. Suggested Problems: Swap two numbers without a temporary variable, Quadratic Equation, Valid Palindrome
3. Implement a Python program that simulates a real-world system or process using conditions and iterative loops. (CO1)
4. Suggested Problems: check whether an alphabet is a vowel or consonant, the sum of all even numbers from 0 to n, factorial of a number (CO1)
5. Implementation of Strings in the program.
6. Suggested Problems: Determine if string halves are alike, palindrome, character count, replacing characters
7. Implementation of real-time/technical applications using Lists and Tuples.(CO2)
8. Suggested Problems: Minimum Index Sum of Two Lists concatenate two lists index-wise, Tuple with the same product, Copy specific elements from one Tuple to a new tuple)
9. Implementation of real-time applications using Sets and Dictionaries. (CO2,CO3)
10. Suggested Problems: Magic Dictionary, Longest Word in Dictionary, Set Mismatch and Smallest Number in Finite Set
11. Implementation of Functions in the program. (CO3)
12. Suggested Problems: Factorial, largest number in a list, area of shape
13. Implementation of file-handling operations. (CO4)
14. Suggested Problems: copy from one file to another, wordcount, longest word
15. Implementation of applications of standard libraries. (CO4)
16. Suggested Problems: Handle scalars to work on the NumPy array, insert values at random positions in an array, Convert the index of a series into a column of a data frame, combine many series to form a data frame, get frequency counts of unique items of a series, Union of two arrays, convert a NumPy array to a data frame of a given shape, Plotting datasets.
17. Implementation of OOP concepts in Python (CO5)

Project: (30)

Develop a web application for any real-world problem

4. Course Outcomes

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS382.1	Apply syntax and semantics of Python programming language for developing real-world applications
U23CS382.2	Analyse Python solutions by implementing lists, tuples and dictionaries
U23CS382.3	Create file system applications with built-in functions
U23CS382.4	Apply principles of OOP and MongoDB
U23CS382.5	Analyse data manipulation techniques and develop web pages with the Django Framework

U23CS451	Data Structures Laboratory	L	T	P	J	C
		0	0	4	0	2

1. Course Description:

The Data Structure Laboratory is a hands-on course designed to complement theoretical knowledge with practical implementation skills in data structures. Through a series of lab sessions, students will work on implementing code and projects focusing on lists, stacks, queues, sorting algorithms, searching techniques, hashing, trees and graph data structures. By actively engaging in coding exercises and projects, students will deepen their understanding of the course, enhance their programming skills, and gain valuable experience applicable across various computer science and engineering domains.

2. Course Objectives:

1. To build and work with linear and nonlinear data structures like arrays, linked lists, stacks, queues, trees, and graphs.
2. To discover data structures to solve real-world problems and scenarios, demonstrating an understanding of trade-offs and limitations
3. To equip students' skills in designing, implementing, and analyzing tree-based solutions to complex problems
4. To familiarize and work with algorithms, including traversal, shortest paths, and network flow, to solve complex problems
5. To implement and analyze sorting, searching, and hashing techniques to optimize data retrieval and manipulation in various contexts

3. List of Experiments**(60 Periods)**

1. Develop a Multimedia Library Management System that organizes and manages various types of multimedia content such as audio, video, and images. Each type of content requires a different approach for efficient management. Choose a suitable linked list operation for each multimedia category's specific needs. (C01)
2. Demonstration of applications of Linked List (Reversal Problems, Segregation of Even and Odd nodes in Linked List, Palindrome checking using Linked List, Loop Detection, Sorting the bitonic using doubly linked list) (C01)
3. Build a critical software project for a large healthcare organization that processes and manages a high volume of patient data, requiring efficient and reliable data structures for task management, resource allocation, and communication. Select appropriate data

- structures (stacks and queues) for specific use cases, considering their performance characteristics, flexibility, and memory usage. (CO2)
4. Demonstration of applications of Stack and Queue (Evaluating Postfix Expressions, Infix to Postfix conversion, Balancing symbols and Postfix evaluation, Wild card pattern matching)(CO2)
 5. Develop a movie recommendation system for a popular streaming platform that recommends movies to users based on their past watching history and preferences. Use a binary tree data structure to store and search for movies based on different criteria efficiently. (CO3)
 6. Build an online bookstore with a vast collection of books to manage the inventory efficiently and provide a seamless user experience with the help of a Binary Search Tree (BST) data structure.(CO3)
 7. Demonstration of applications of Trees (Segment Tree and Range Minimum Query on the Constructed Segment Tree, Maximum depth of Binary tree) (CO3)
 8. Design a network for any food delivery partner to understand how people are connected, and how information flows through the network and identify influential users using graph traversal algorithms. (CO4)
 9. Construct a travel management system that aims to streamline the planning and organization of travel itineraries for a travel agency. The system utilizes various graph algorithms (Topological Sort, Connected Graph and Ticket Itinerary) to efficiently manage the complexities of travel planning. (CO4)
 10. Design a food delivery app for a bustling city. Thousands of orders flow daily, and ensuring fast and efficient delivery is crucial for customer satisfaction. Use Dijkstra's algorithm to find the shortest paths for delivery drivers, optimizing their routes and minimizing delivery times.(CO5)
 11. Design an optimized network infrastructure of an organization that connects the various departments within the organization using the minimum amount of cabling to reduce costs and enhance network efficiency. Implement Prim's and Kruskal's algorithms for finding the Minimum Spanning Tree (MST) for the network. (CO5)
 12. Create a Student Grade Management System for a university that efficiently organizes and displays student grades for various courses. The system should employ different sorting algorithms to cater to diverse requirements and optimize the display of grades. Choose the suitable sorting algorithms (Bubble Sort, Insertion Sort, Quick Sort, Merge Sort) for quick grade overview, mark entry, course ranking and overall grade report. (CO5)
 13. Develop a Product Inventory Management System for a retail company that handles a large number of products to implement efficient searching techniques to retrieve information about products in the inventory quickly. Select the appropriate searching technique (Linear Search, Binary Search) for quick product lookup, inventory sorting, and retrieval. (CO5)
 14. Demonstration of applications of hashing (Single swap sorted array, Anagram Checking and Range Minimum Query Using Sparse Table, Merge two sorted arrays) (CO5)

2. <https://in.coursera.org/learn/data-structures?action=enroll>

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS451.1	Solve Problems by applying the concepts of Linked Lists
U23CS451.2	Implement Stacks and Queues with Array and LinkedList and solve problems with Stacks and Queues
U23CS451.3	Implement tree data structures and demonstrate tree operations such as insertion, deletion, traversal and balancing
U23CS451.4	Implement the graph-based algorithms to solve complex problems requiring efficient data traversal and manipulation
U23CS451.5	Apply sorting, searching and hashing algorithms to organize and retrieve data effectively

U23CS452	Object Oriented Programming using C++ Laboratory	L	T	P	J	C
		0	0	2	0	1

1. Course Description:

Object Oriented Programming (OOP) Using C++ Laboratory is a practical course aimed at reinforcing theoretical concepts through implementation and real-world applications. Students will engage in coding assignments and projects focusing on core OOP principles, including inheritance, polymorphism, encapsulation and abstraction implemented in the C++ programming language. Additionally, students will explore common data structures and containers, leveraging their understanding of OOP to design and implement efficient solutions. Through a series of real-time application projects, students will apply their knowledge to solve complex problems, gaining valuable experience in software development and engineering practices.

2. Course Objectives:

1. Instruct students in the foundational principles of C++.
2. Teach students the key concepts of Object-Oriented Programming (OOP) in C++.
3. Guide students in understanding and applying inheritance and polymorphism in C++.
4. Enable students to implement standard data structures and containers in C++.
5. Train students to develop concurrent applications using C++.

3. List of Experiments**30 periods**

1. Data types, variables, and constants:
 - i. Compose a C++ program that demonstrates proficient utilization of various data types, variables, and constants to ensure efficient and purposeful data handling within the program(CO1)
2. Control Flow Statements:
 - i. Develop a C++ program that simulates the modern warehouse automation system. It demonstrates its ability to monitor inventory levels, process incoming and outgoing shipments to effectively manage the execution flow, and generate real-time reports to optimize warehouse operations(CO1)
3. Operators and Expressions:
 - i. Create a comprehensive C++ program that allows users to perform various operations on their stock holdings. The program should provide functionality for buying and

selling stocks, calculating portfolio performance metrics, and making investment decisions based on given criteria(CO1)

4. Functions, Pointers and Arrays:

Implement a bank management system with C++ functions to handle transactions, account balances, and user authentication, thereby enhancing modularity, code reusability, and the overall efficiency of the program.(CO2)

5. Develop a C++ program that uses pointers to swap the values of two integers. Use type casting to access and manipulate the values through pointers.(CO2)

6. Develop a C++ program to implement a student grade tracker using arrays. Create an array to store the grades of multiple students and implement functions to calculate the average, find the highest and lowest grades, and display the overall performance.(CO2)

7. String Handling:

i. Design a C++ program that generates personalized greeting strings based on user input. The greeting system requires creating a string consisting of a user's chosen greeting phrase replicated multiple times. If the chosen greeting is less than three characters, then the program should return n copies of the entire phrase.(CO3)

ii. Develop a secure access card generation system using string manipulation functions. Build a C++ program that generates a string consisting of four copies of the first two characters of the employee's name functions and produces a clear identification code.(CO3)

8. Design a C++ program for a dynamic blogging platform with an advanced content management system. Implement a feature that generates unique content identifiers for blog posts based on the author's name and the topic of the post.(CO3)

9. Object-Oriented Concepts:

i. Develop a C++ program to create a library catalog system using classes and objects. Implement member functions to display book information and manage the catalog.

ii. Develop a C++ program to simulate an online shopping cart using classes and objects. Define a class Implement member functions to add products to the cart, calculate the total cost, and display the items in the cart.

iii. Develop a C++ program that showcases inheritance by creating a hierarchy of vehicles. Implement a base class Vehicle and derive two classes, Car and Motorcycle, from it. Each derived class should have specific attributes and extended functionalities.

iv. Create a C++ program that demonstrates polymorphism by implementing a shape hierarchy and calculating the area of different shapes through a common interface(CO3)

10. Standard Template Library (STL):

i. Develop a C++ program that uses dynamic memory allocation and a linked list structure to manage an Employee Database. Implement operations such as inserting a new employee, deleting an employee, and updating employee information. Ensure proper memory management to avoid memory leaks. (CO4)

11. Create a C++ program that uses dynamic memory allocation to implement a stack for managing Undo/Redo history. Implement operations such as pushing a state onto the stack (undo) and popping a state off the stack (redo). (CO4)

12. Develop a C++ program that uses dynamic memory allocation to implement a queue for managing a print queue. Implement operations such as enqueueing a print job and dequeuing a print job. (CO4)

13. Design a C++ program to manage product inventory using a vector of product objects. Sort products based on their prices using a sort operation and allow users to search for a product by name using binary search. (CO4)
14. Design a C++ program for managing course enrolments in an online learning platform using a tree data structure implemented with map operation. This program should allow users to add new courses, enrol students in courses, and efficiently search for available courses based on enrolment status and capacity using the lower bound algorithm. (CO5)
15. File handling:
 - i. Design a C++ program that reads a given text file, counts the number of words present, and displays the result. (CO5)
16. **Project work:**
Design and implement a practical application using C++ and OOP concepts.

1. https://onlinecourses.nptel.ac.in/noc21_cs02/preview
2. https://onlinecourses.nptel.ac.in/noc22_cs42/preview

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS452.1	Develop and demonstrate problem-solving for simple applications
U23CS452.2	Design and implement simple classes in C++ with well-defined attributes, methods, and appropriate access modifiers
U23CS452.3	Apply the concepts of inheritance and polymorphism by creating and managing class hierarchies and demonstrate runtime polymorphism
U23CS452.4	Implement appropriate Standard Template Library (STL) containers for various real-time applications
U23CS452.5	Implement real-time concurrent processing solutions by applying threads, mutexes and asynchronous programming

U23EM752	Logical Thinking	L	T	P	J	C
		0	0	2	0	1

1. Course Description:

This course aims to help students build strong skills in logical thinking, reasoning and problem-solving. They will learn to analyze and evaluate arguments, spot logical fallacies and create clear and convincing arguments. Through lectures and practical exercises, students will develop the critical thinking needed to tackle engineering problems methodically and

precisely. They will also understand the importance of logical thinking in designing and implementing engineering solutions, making them more effective engineers.

2. Course Objectives:

1. Apply logical algorithms to tackle complex problem-solving scenarios.
2. Develop analytical skills for optimizing costs in logical operations.
3. Master time and resource management through logical approaches.
4. Strengthen quantitative reasoning for data-driven decision-making.
5. Enhance logical and visual reasoning to solve intricate problems effectively.

3. Syllabus:

30 Periods

Unit-I: Fundamental Skills for Problem Solving

(6)

Application of Problem-Solving in real life, Different algorithms in problem-solving: Brute force approach, Pattern finding method and Deep Learning Approach. Numbers System: Primes and factors, factors and factorials, divisibility rule, unit digit calculation and power cycle method, remainder concepts, HCF and LCM.

Unit-II: Critical Analysis of Cost Management

(6)

Fundamentals of Finance: Percentages, Fluctuations in percentage, Profit and Loss, Pricing Logics, Retail Pricing Strategy; Interest calculation: Cash Flow and Taxes; Simple and Compound interest calculation, Puzzle related to interest changes and Case Studies.

Unit-III: Time and Work Management

(6)

Fundamentals of Human Resources and Operations: Resources allocation, Time and Work, Puzzle involving backtracking, All possible routes, Pipes and Cisterns.

Unit-IV: Quantitative Reasoning and Data Interpretation

(6)

Fundamentals of statistics: Mean, Median and Mode, Real-life application of statistics, Application of Ratios and Proportions in business problems, Partnerships; Geometry: 2D, 3D Visualization.

Unit-V: Logical and Visual Reasoning

(6)

Paradigm shift and its application: Syllogism, Cube 3D visualization problems, Blood Relation, Coding decoding: Basics and Advanced. Visual reasoning: Patterns, Paper folding, Case Studies and Puzzles.

U23EM752.4	Use quantitative methods and interpret data to make informed decisions.	K2
U23EM752.5	Create solutions to complex logical and visual reasoning problems by applying advanced reasoning techniques	K3

U23MC902	Tamils and Technology / தமிழரும் தொழில்நுட்பமும்	L	T	P	J	C
		1	0	0	0	1

1. Course Description:

The intersection of Tamils and technology refers to the field of agricultural technology, focusing on the use of modern tools and techniques to enhance farming practices and increase agricultural productivity.

2. Course Objectives:

1. To increase agricultural productivity and profitability by implementing innovative solutions that optimize resource usage, minimize losses, and enhance crop yields.
2. To automate the irrigation systems to adjust water usage based on real-time data on soil moisture levels, weather forecasts, and crop water requirements.

3. Syllabus:

15 Periods

Unit-I: Weaving and Ceramic Technology / நெசவு மற்றும் பானைத் தொழில்நுட்பம் (3)

Weaving Industry during Sangam Age – Ceramic Technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries.

சங்க காலத்தில் நெசவுத் தொழில் - பானைத் தொழில்நுட்பம் - கருப்பு சிவப்பு பாண்டங்கள் - பாண்டங்களில் கீறல் குறியீடுகள்.

Unit-II: Design and Construction Technology / வடிவமைப்பு மற்றும் கட்டிடத் தொழில்நுட்பம் (3)

Designing and Structural construction of Houses & Designs in household materials during the Sangam Age - Building materials and Hero stones of Sangam Age – Details of Stage Constructions in Silappathikaram - Sculptures and Temples of Mamallapuram - Great Temples of Cholas and other worship places - Temples of Nayaka Period - Type study (Madurai Meenakshi Temple)- Thirumalai Nayakar Mahal - Chetti Nadu Houses, Indo - Saracenic architecture at Madras during British Period.

சங்க காலத்தில் வடிவமைப்பு மற்றும் கட்டுமானங்கள் & சங்க காலத்தில் வீட்டுப் பொருட்களில் வடிவமைப்பு- சங்க காலத்தில் கட்டுமான பொருட்களும் நடுகல்லும் - சிலப்பதிகாரத்தில் மேடை அமைப்பு பற்றிய விவரங்கள் - மாமல்லபுரம் சிற்பங்களும், கோவில்களும் - சோழர் காலத்துப் பெருங்கோயில்கள் மற்றும் பிற வழிபாட்டுத் தலங்கள் - நாயக்கர் காலக் கோயில்கள் - மாதிரி கட்டமைப்புகள் பற்றி அறிதல், மதுரை மீனாட்சி அம்மன் ஆலயம் மற்றும் திருமலை நாயக்கர் மஹால் - செட்டிநாட்டு வீடுகள் - பிரிட்டிஷ் காலத்தில் சென்னையில் இந்தோ- சாரோசெனிக் கட்டிடக் கலை

Unit-III: Manufacturing Technology / உற்பத்தித் தொழில் நுட்பம் (3)

Art of Ship Building - Metallurgical studies - Iron industry - Iron smelting, steel -Copper and gold- Coins as source of history - Minting of Coins – Beads making-industries Stone beads - Glass beads - Terracotta beads -Shell beads/ bone beats - Archeological evidence - Gem stone types described in Silappathikaram.

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 641202.

கப்பல் கட்டும் கலை - உலோகவியல் - இரும்புத் தொழிற்சாலை - இரும்பை உருக்குதல், எஃகு - வரலாற்றுச் சான்றுகளாக செம்பு மற்றும் தங்க நாணயங்கள் - நாணயங்கள் அச்சடித்தல் - மணி உருவாக்கும் தொழிற்சாலைகள் - கல்மணிகள், கண்ணாடி மணிகள் - சுடுமண் மணிகள் - சங்கு மணிகள் - எலும்புத்துண்டுகள் - தொல்லியல் சான்றுகள் - சிலப்பதிகாரத்தில் மணிகளின் வகைகள்.

Unit-IV: Agriculture and Irrigation Technology / வேளாண்மை மற்றும் நீர்ப்பாசனத் தொழில் நுட்பம் (3)

Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoombu of Chola Period, Animal Husbandry - Wells designed for cattle use - Agriculture and Agro Processing - Knowledge of Sea - Fisheries – Pearl - Conche diving - Ancient Knowledge of Ocean - Knowledge Specific Society.

அணை, ஏரி, குளங்கள், மதகு - சோழர்காலக் குழுமித் தூம்பின் முக்கியத்துவம் - கால்நடை பராமரிப்பு - கால்நடைகளுக்காக வடிவமைக்கப்பட்ட கிணறுகள் - வேளாண்மை மற்றும் வேளாண்மைச் சார்ந்த செயல்பாடுகள் - கடல்சார் அறிவு- மீன்வளம் முத்து மற்றும் முத்துக்குளித்தல் - பெருங்கடல் குறித்த பண்டைய அறிவு - அறிவுசார் சமூகம்.

Unit-V: Scientific Tamil and Tamil Computing / அறிவியல் தமிழ் மற்றும் கணித்தமிழ் (3)

Development of Scientific Tamil - Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.

அறிவியல் தமிழின் வளர்ச்சி - கணித்தமிழ் வளர்ச்சி - தமிழ் நூல்களை மின்பதிப்பு செய்தல் - தமிழ் மென்பொருட்கள் உருவாக்கம்- தமிழ் இணையக் கல்விக்கழகம் - தமிழ் மின் நூலகம் - இணையத்தில் தமிழ் அகராதிகள் - சொற்குவைத் திட்டம்.

Text Books:

1. தமிழக வரலாறு மக்களும் பண்பாடும் கே.கே.பிள்ளை (வெளியீடு - தமிழ்நாடு பாடநூல் மற்றும் கல்வியியல் பணிகள் கழகம்).
2. கணினித் தமிழ் - முனைவர் இல. சுந்தரம். (விகடன் பிரசுரம்).
3. கீழடி - வைகை நதிக்கரையில் சங்ககால நகர நாகரிகம் (தொல்லியல் துறை வெளியீடு).
4. பொருறை - ஆற்றங்கரை நாகரிகம். (தொல்லியல் துறை வெளியீடு).
5. Social Life of Tamils (Dr.K.K.Pillay) A joint publication of TNTB & ESC and RMRL – (in print)
6. Social Life of the Tamils - The Classical Period (Dr S.Singaravelu) (Published by: International Institute of Tamil Studies.
7. Historical Heritage of the Tamils (Dr.S.V.Subatamanian, Dr.K.D. Thirunavukkarasu) (Published by: International Institute of Tamil Studies).
8. The Contributions of the Tamils to Indian Culture (Dr M.Valarmathi) (Published by: International Institute of Tamil Studies.)
9. Keeladi - 'Sangam City Civilization on the banks of river Vaigai' (Jointly Published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation, Tamil Nadu)

2. Porunai Civilization (Jointly Published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation, Tamil Nadu).

4. Course Outcomes/ பாடநெறி முடிவுகள்:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome / பாடநெறி முடிவுகள்
U23MC902.1	Describe about the weaving industry in sangam age and ceramic technology. சங்க காலத்தில் நெசவுத் தொழில் மற்றும் பீங்கான் தொழில்நுட்பம் பற்றி விரிவாக அறிந்து கொள்ளுதல்.
U23MC902.2	Observe the design of houses, sculptures and construction of temples. வீடுகளின் வடிவமைப்பு, சிற்பங்கள் மற்றும் கோவில்களின் கட்டுமானத்தைப் பற்றி தெரிந்து கொள்ளுதல்.
U23MC902.3	Relate the various manufacturing materials and stone types in Silappathikaram. சிலப்பதிகாரத்தில் உள்ள பல்வேறு உற்பத்திப் பொருட்கள் மற்றும் கல் வகைகளைப் பற்றி புரிந்து கொள்ளுதல்.
U23MC902.4	Understand the significance of agriculture and irrigation technology in the ancient period. பண்டைய காலத்தில் விவசாயம் மற்றும் நீர்ப்பாசன தொழில்நுட்பத்தின் முக்கியத்துவத்தை புரிந்து கொள்ளுதல்.
U23MC902.5	Explain the growth of scientific Tamil, Tamil computing and the digitization of Tamil books. அறிவியல் தமிழின் வளர்ச்சி, தமிழ்க் கணினி, தமிழ் நூல்களின் டிஜிட்டல் மயமாக்கல் ஆகியவற்றை விரிவாக தெரிந்து கொள்ளுதல்.

SEMESTER III

U23MA204	Discrete Mathematics	L	T	P	J	C
		3	1	0	0	4
1. Course Description:						
Discrete Mathematics is a foundational course that explores mathematical structures and concepts fundamental to computer science, information technology, AI, cryptography, and other fields. The course covers wide range of foundational concepts and techniques in discrete mathematics, emphasizing both theoretical understanding and practical problem-solving skills. This course helps to analyze and solve problems using discrete mathematical techniques such as propositional calculus, counting techniques, combinatorial principles, graphical representations and residual classes in number theory.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Familiarize the students to verify the correctness of an argument using symbolic logic and truth tables. 2. Train the students to solve problems using counting techniques. 3. Introduce various techniques in combinatorics and solving recurrence relations. 4. Impart the basic concepts of graphs and isomorphism between graphs. 5. Inculcate effectively the concepts and results of congruence. 						
3. Syllabus :		45 +15 = 60 Periods				
Unit-I: Logic and Proofs		(9+3)				
Propositional logic: Propositional equivalences, Normal forms; Predicates and quantifiers ; Rules of inference.						
Unit-II: Counting Principles		(9+3)				
Well ordering principle; Basics of counting; Balls and Bins problems; The pigeonhole principle; Inclusion and exclusion principle.						
Unit-III: Combinatorics		(9+3)				
Mathematical induction; Permutation and combination; Recurrence relations: Formation of Recurrence relation, Generating functions, Solving linear recurrence relation.						
Unit-IV: Introduction to Graph Theory		(9+3)				
Graphs:Types of graphs, matrix representation of graphs, walk, path, circuit, graph isomorphism using adjacency matrix and circuits, Euler graph, Hamiltonian graph.						
Unit-V: Introduction to Number Theory		(9+3)				
Linear diophantine equations; Congruence: Linear congruence, simultaneous linear congruences, Chinese remainder theorem (statement only), Wilson's theorem, Fermat's theorem, Euler's theorem.						
List of Tutorials :						
<ol style="list-style-type: none"> 1. Construction of truth tables. (CO 1) 2. Solving recurrence equations. (CO 3) 3. Finding Permutations and combinations. (CO 3) 4. Construction of graphs and digraphs. (CO 4) 5. Matrix representstion of graphs. (CO 4) 6. Tracing Traversals, shortest path and cycles in a graph. (CO 4) 7. Solving Linear Diophantine equation. (CO 5) 8. Solving linear congruence and system of linear congruences. (CO 5)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23MA204.1	Apply the fundamental concepts of logics and inference theory in proving and testing the logics.
U23MA204.2	Operate counting problems by using the appropriate elementary counting techniques.
U23MA204.3	Utilize induction techniques and generating functions to solve mathematical statements.
U23MA204.4	Analyze the types of circuits in a graph, the existence of isomorphism and sketch the Euler and Hamiltonian paths and circuits in a graph.
U23MA204.5	Validate the congruence using the classical theorems and can perform the divisibility test using congruence.

U23CS403	Design and Analysis of Algorithms	L	T	P	J	C
		3	0	0	0	3
1. Course Description:						
<p>This course explores the fundamental principles of algorithmic design and analysis, equipping students with the essential tools to tackle complex computational problems efficiently. Through a comprehensive exploration of various algorithmic techniques, including Brute Force, Divide-and-Conquer, Dynamic Programming, Greedy Approach, Backtracking, and Branch and Bound, students will gain a profound understanding of how to formulate, analyze and optimize algorithms for diverse applications. Through hands-on exercises, projects and theoretical discussions, students will develop the skills necessary to design algorithms, assess their efficiency, and make informed decisions regarding algorithm selection for real-world problems.</p>						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. To familiarize the student with analysis of algorithmic efficiency, including time and space complexity, to evaluate and compare algorithm performance. 2. To make students to work on efficient solutions to complex problems using brute force and divide-and-conquer techniques 3. To acquaint students with dynamic programming techniques to solve complex optimization problems. 4. To enable students to understand and apply the greedy approach to solve optimization problems. 5. To Equip students with the problem-solving strategies of backtracking and branch and bound problems. 						
3.Syllabus:						45 Periods
Unit-I: Algorithm Analysis Techniques						(9)
<p>Notion of an algorithm , Importance & role of algorithms in computing , Important problem types ; Analysis of algorithmic efficiency , Time and Space Complexity , Asymptotic notations and their properties ; Analysis framework: Mathematical analysis for recursive and non-recursive algorithms; String Algorithms: Naïve algorithm , Rabin Karp Algorithm , KMP Algorithm , Manachers algorithm</p>						
Unit-II: Brute Force and Divide-And-Conquer						(9)
<p>Brute force: Selection sort , String matching , Exhaustive search , Boyer Moore algorithm , Travelling salesman problem , Knapsack problem , Assignment problem , Huffman codes and data compression; Divide and Conquer: Binary search , Quick sort , Heap sort , Multiplication of large integer</p>						
Unit-III: Dynamic Programming						(9)
<p>Ugly numbers ; Coin changing problem ; Friends pairing problem ; Golomb sequence ; Warshall's algorithm , Floyd's algorithm , Multi stage graph , Optimal binary search trees , Fractional Knapsack Problem , K Knight's tour on chess board</p>						
Unit-IV: Greedy Approach						(9)
<p>Definition , Activity selection problem , Longest common subsequence , Sieve of Sundaram , Assign mice to holes; Huffman trees , Sparse matrix , Bloom filter</p>						

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 641202.

Unit-V: Backtracking and Branch and Bound**(9)**

Backtracking, Rat in maze , Permutation and Combination , N Queen problem , Hamiltonian circuit problem , Knight's tour problem , Subset sum problem , Graph Coloring ; Branch and Bound: Assignment problem , Knapsack problem , Travelling salesman problem

2. <https://www.udemy.com/course/design-and-analysis-of-algorithm>

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS403.1	Understand the importance of designing strategies, time and space complexity
U23CS403.2	Apply brute force and divide and conquer strategies in solving problems
U23CS403.3	Apply dynamic programming in solving complex problems
U23CS403.4	Apply greedy algorithms in solving optimization problems
U23CS403.5	Compare the time and space complexities of different types of algorithms

U23CS404	Database Management Systems	L	T	P	J	C
		3	0	0	0	3

1. Course Description:

This course offers a comprehensive exploration of Database Management Systems (DBMS) theory, focusing on essential concepts and principles underlying the design, implementation and optimization of databases. Students will explore into various topics, including an Introduction to Databases, Structured Query Language (SQL) & Procedural Language/SQL (PL/SQL), Transaction and Concurrency Control, Storage & Indexing, and NoSQL databases. The students will gain a deep understanding of database architectures, data modelling techniques, query languages, transaction management strategies, storage mechanisms, indexing methods and the role of NoSQL databases in modern data management.

2. Course Objectives:

1. To enable students to understand the fundamental concepts and principles of database management.
2. To teach students to master the database querying and programming using SQL and PL/SQL

Chairman - Board of Studies

3.	To foster students to learn the principles and mechanisms of transaction processing and concurrency control
4.	To familiarize students to design and implement efficient database storage and indexing solutions
5.	To acquaint students to effectively use NoSQL databases to build scalable, high-performance applications
3.Syllabus:	
45 periods	
Unit-I: Introduction to Databases	
(9)	
Purpose of Database , Types and examples of Databases (RDBMS, NOSQL, In-memory Databases & Distributed SQL databases) , Relational Database System Architecture ; Views of Data , Schema architecture , Data Independence , Schema and instance ; Data Models , Benefits and Phases of Data Model ; ER Diagram: Symbols , Components , Relationships , Weak entities , Attributes , Cardinality , Extended ER Diagram , Examples ; Relational Data Model ; Keys ; Relational Algebra ; Normalization: 1NF, 2NF, 3NF, BCNF,4NF,5NF;	
Case Study: ER Diagram on Online Streaming, Movie Ticket Recommendation, Bike Tracking	
Unit-II: SQL & PL/SQL	
(9)	
SQL Fundamentals : DDL Commands , Create, Drop, Alter, Truncate, Rename ; Keys : Primary Key, Candidate Key, Super Key, Foreign Key ;DML Commands , DQL Commands : Select, Insert, Update, Delete, Any, All, In, Exists, Non-Exists, Union, Intersection ; Advanced SQL Features , Aggregate Functions : SUM, COUNT, AVG, MIN, MAX, EXPLAIN, COALESCE ; Clauses , Order By , Group By, Having, CASE, LIMIT,WITH Clause, Date Functions, String Functions ; Subqueries , Nested, Correlated, Joins : Inner, Outer, and Equi-Joins ; Order of Execution, Embedded SQL , Dynamic SQL ; Creation and Dropping of Views, Types of Views , Creation and Execution of Stored Procedures , Cursors : Opening, Fetching, and Closing ; Triggers : Creation, Insertion, Deletion, and Updating Database ; Exception Handling ; MySQL JDBC Connectivity	
Case Study: Online Streaming, Movie Ticket Recommendation, Bike Tracking, Import/Export Random records from CSV file to MYSQL	
Unit-III: Transaction and Concurrency Control	
(9)	
Transaction processing: ACID Properties , Failure and Recovery , Schedules , Serializability , Concurrency Control , Lock-based protocol , Isolation levels ; SQL Facilities for concurrency and recovery , Database Integrity, Security and Authorization	
Case Study: ACID Properties in Online Streaming Database	
Unit-IV: Storage & Indexing	
(9)	
Overview of Storage Techniques : File organization , RAID ; Indexing : Types of ordered indices , B & B+ tree ; Hashing : Static & Dynamic Hashing , Query Processing & Optimization , SQL Performance Tuning	
Case Study: Indexing in Online Streaming Database to optimize the retrieval of data	
Unit-V: NOSQL	
(9)	
Need for NO SQL , Characteristics of NOSQL , Key-value database , Columnar Databases , Apache Cassandra , Click House , Document Databases , MongoDB : CRUD operations with MongoDB , MongoDB JDBC Connectivity , MongoDB Testing , Graph Databases , Metabase	
Case study: Conversion of Online Streaming Database (RDBMS) to MongoDB

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS404.1	Use data models and depict a database system
U23CS404.2	Design relations for various business requirements
U23CS404.3	Understand the properties of the database and recovery process
U23CS404.4	Understand the optimization techniques in database storage
U23CS404.5	Design non-structured database systems in application development

U23MA281	Business Analytics	L	T	P	J	C
		2	0	2	0	3
1. Course Description:						
Business analytics presents quantitative techniques for data analysis and improved managerial decision-making. Statistics is the tool to formulate data-based models and apply them to process data. This course provides a foundational understanding of statistical methods, essential for making informed decisions in diverse fields such as science, engineering, business, and social sciences. It gives students the ability to apply course concepts to real business problems.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Familiarize with statistical data graphically. 2. Equip the students on various sampling techniques. 3. Inculcate inference about the population on the basis of a random sample. 4. Facilitate the various concepts of estimation theory. 5. Elucidate the correlation and regression to interpret the regression equation. 						
3. Syllabus:		30 +30 = 60 Periods				
Unit-I: Visualization of Data		(6)				
Diagrammatic and graphical representation of data: Simple bar diagram, pie chart, pareto chart, frequency curves, histogram, frequency polygon, ogive, cumulative frequency curve.						
Unit-II: Sampling Techniques		Chairman - Board of Studies (6)				

Random sampling: Sampling from finite and infinite populations, estimates and standard error (sampling with replacement and sampling without replacement); Sampling distribution of sample mean; Stratified random sampling.	
Unit-III: Testing of Hypothesis	(6)
Sampling distributions: Statistical hypothesis; Large sample test: single mean, difference of means and proportion; Small sample tests: t-test, F-test; Chi-square test: Goodness of fit, independence of attributes.	
Unit-IV: Estimation	(6)
Point estimation: Unbiased estimator; Methods of point estimation: Method of moments, method of maximum likelihood estimation.	
Unit-V: Linear and Multiple Regression	(6)
The scatter plot; Correlation: Types, Karl Pearson's coefficient of correlation; Linear regression: Least squares method; Multiple regression.	
Laboratory Exercises:	30 Periods
<ol style="list-style-type: none"> 1. Collect and organize data into categories of charts such as Bar, Pareto and Histogram. (CO 1) 2. Calculate cumulative frequencies of a dataset and plot the points using ogive, frequency polygon and cumulative frequency curve. (CO 1) 3. Sampling with and without replacement from a finite population and infinite population. (CO 2) 4. Calculate sample estimates and standard errors for different sampling methods. (CO 2) 5. Illustrate the sampling distribution of the sample mean and stratified random sampling. (CO 2) 6. Perform a large sample test for a single mean, difference of means and proportion. (CO 3) 7. Perform a t-test for a single mean and difference of means. (CO 3) 8. Perform an F-test for comparing variances. (CO 3) 9. Perform a Chi-Square test for the goodness of fit, independence of attributes. (CO 3) 10. Demonstrate the concept of unbiasedness and consistency of an estimator. (CO 4) 11. Estimate the parameters of a distribution using maximum likelihood estimation (MLE). (CO 4) 12. Demonstrate positive, negative, and no correlation with scatter plots and calculate Karl Pearson's coefficient of correlation. (CO 5) 13. Perform linear, multiple regression analysis and interpret the results. (CO 5)

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23MA281.1	Interpret the real-time data by graphical representations and highlight outliers.
U23MA281.2	Implement random sampling for accurate and reliable inference about population.
U23MA281.3	Develop and test hypotheses to inform managerial decisions.
U23MA281.4	Evaluate the values of parameters based on measured empirical data.
U23MA281.5	Interpret single and multiple variable regression analysis.

U23EC382	Digital Principles and Computer Organization	L	T	P	J	C
		3	0	2	0	4
1. Course Description:						
<p>This course provides a thorough exploration of the foundational concepts in digital systems, including binary arithmetic, logic gates, and sequential circuits. It emphasizes the organization of computer systems, with in-depth coverage of CPU architecture, memory systems, and input/output mechanisms. Students will gain valuable insights into how these critical components work together to create modern computing systems. By the end of the course, participants will have a solid understanding of digital principles and computer organization, preparing them to navigate and contribute to the rapidly evolving field of computing.</p>						
2. Course Objectives:						
<ol style="list-style-type: none"> To facilitate understanding of logic gates and minimization techniques. To guide design of simple combinational logic circuits. To instruct on operation of sequential logic circuits. To demonstrate the basic architecture of computer organization. To explain the principles of parallel processing and memory hierarchy. 						
3.Syllabus:		45 + 30 = 75 Periods				
Unit-I: Logic Gates and Minimization Techniques						(9)
Basic Theorems and properties of Boolean algebra – canonical form and standard forms – digital logic gates – Minimization Techniques: K-Map (up to 4 variables) – Don't care condition - NAND & NOR Implementation.						

Unit-II: Combinational Logic Circuits	(9)
Combinatorial Logic Circuits: Design Procedure – Half adder and Full adder – Half Subtractor and Full Subtractor – Magnitude comparator – Encoder and Decoder - Multiplexer and Demultiplexer – code converter (binary to gray, BCD to excess-3 and vice versa)	
Unit-III: Sequential Logic Circuits	(9)
Sequential Circuits: Flip-flops-Trigerring of Flip-flops- Registers – Shift Registers – Ripple Counters -Synchronous counters (up and down counter) – Random Access Memory (RAM)	
Unit-IV: Basic Computer Organization	(9)
Data Representation: Fixed and Floating Point – Micro operations: Arithmetic, Logic, shift – Arithmetic Logic Shift Unit – Instruction Codes – Computer registers – Computer Instructions – Timing and control – Instruction Cycle – Design of Basic computer	
Unit-V: Performance Enhancement Techniques	(9)
Parallel processing - Pipelining – Arithmetic and Instruction pipeline – RISC pipeline - Memory hierarchy Main memory - Cache memory – Characteristics and Multiprocessors – Interconnection Structures.	
List of Experiments:	(30 Periods)
<ol style="list-style-type: none"> 1. Verification of Boolean theorems using logic gates. (CO 1) 2. Implementation of half adder and full adder using logic gates. (CO 2) 3. Implementation of Multiplexer and De-multiplexer using logic gates. (CO 2) 4. Verification of JK and D Flip-flops. (CO 3) 5. Implementation of SISO and PIPO 4-bit shift register using Flip- flops. (CO 3) 6. Construction and verification of 4 bit ripple counter and interpret the concepts of logic shift operation. (CO 4) 7. Design and implementation of 2 bit ALU using various combinational circuits. (CO 5)

MOOC / NPTEL / SWAYAM Course:

1. https://onlinecourses.nptel.ac.in/noc20_ee42/preview

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23EC382.1	Understand the working of logic gates and Apply minimization techniques
U23EC382.2	Design of combinational logic circuits
U23EC382.3	Comprehend the operation of sequential logic circuits
U23EC382.4	Understand the basic computer organization
U23EC382.5	Understand the various performance enhancement techniques

U23CS491	Java Programming	L	T	P	J	C
		2	0	2	2	4

1. Course Description:

This course provides a comprehensive understanding of Java programming language and its application development capabilities. Through theoretical discussions and hands-on lab exercises, students will learn the foundational concepts of Java, object-oriented programming principles, advanced features of Java 8, exception handling, multithreading, JavaFX for GUI development, and JDBC for database connectivity. By the end of the course, students will have the knowledge and skills to develop robust Java applications and graphical user interfaces.

2. Course Objectives:

1. To establish a foundation in Java programming concepts.
2. To empower students to master object-oriented mechanisms in java programming
3. To teach students to expertly handle strings, collections, and Java 8 features
4. To familiarize the students to build reliable and concurrent Java programs using exception handling and multithreading
5. To acquaint students to build dynamic, data-driven desktop applications using JavaFX and JDBC

3. Syllabus:

30+30+30=90 Periods

Unit-I: Foundations of Java

(6)

Overview of OOP, Object oriented programming paradigms, Features of Object Oriented Programming , Java Buzzwords ; Overview of Java : JVM , JDK , Programming Structures in Java, Classes & its types in Java , Data Types, Variables, Operators , Keywords , Control Statements, Wrapper Classes , Constructors , Methods, Access specifiers ; Arrays & its types, java.util.Arrays , Java Doc comments , I/O classes

Unit-II: Object Oriented Mechanisms

(6)

Association , Aggregation, Composition , Polymorphism, Overloading Vs Overriding, Static and Dynamic Binding, Inheritance: Basics, Types of Inheritance, Super, static & final keywords with inheritance and polymorphism, Abstraction, Abstract Classes and Interfaces, Encapsulation, Packages, Access modifiers

Unit-III: Strings, Collections & Java 8 Features

(6)

Strings, creation, declaration of a string, storage structure of a string and its methods, StringBuilder, String Buffer, regex, Collection ; Interface, Generics, List, Set, Map interfaces and classes, Comparable , Comparator , Java lambda expressions, Date & time Object in java 1.8 and its

functions , Streams	
Unit-IV: Exception Handling and Multithreading	(6)
Exception handling , Hierarchy, Types of exception, Mechanisms , try , catch , throw , throws and finally , Exception Propagation - Exception in Inheritance - Introduction to Multiprocessing - threads vs process – threads - Creation of thread - Thread states - Thread Lifecycle and its methods, Executor Framework, Concurrency API, Synchronization Blocks	
Unit-V: Javafx & Jdbc	(6)
JAVAFX Events and Controls: Event Basics , Handling Key and Mouse Events ; Controls: Checkbox, ToggleButton , RadioButtons , ListView , ComboBox , ChoiceBox , Text Controls , ScrollPane , Layouts , FlowPane , HBox and VBox , BorderPane , StackPane , GridPane; Menus: Basics , Menu bars , MenuItem , JDBC , drivers, Steps to create a JDBC application , DB Connection Pool	
List of Experiments:	30 Periods
<ol style="list-style-type: none"> 1. Implement class, objects, data types, operators, control statements, wrapper classes and scanner classes using java (CO 1) 2. Implement command line arguments with i/o packages using java (CO 1) 3. Implement sequential search, binary search and quadratic sorting algorithms using java (CO 1) 4. Implement encapsulation, abstraction, polymorphism and inheritance using java (CO 2) 5. Implement interface by accessing super class constructors and methods using java (CO 2) 6. Implement string, string functions, string builder, string buffer and regex using java (CO 3) 7. Implement lambda expression & for each() method using java (CO 3) 8. Implement generics-wildcard expression using java (CO 3) 9. Implement stack and queue data structures using java (CO 3) 10. Implement list, map, set, date and time using java (CO 3) 11. Implement exception handling by creating user-defined exceptions using java (CO 4) 12. Implement multithreading and inter-thread communication using java (CO 4) 13. Develop applications using javafx controls, layouts and menus (CO5) 	
Project:	30 Periods
1. Develop a Java application for any real-world problem	
Text Books:	
<ol style="list-style-type: none"> 1. Herbert Schildt., “Java: The Complete Reference”, 12th Edition, McGraw Hill Education, New Delhi, 2019 2. Cay S.Horstmann., “Core Java Fundamentals”, Volume 1, 11th Edition, Prentice Hall, 2018

2. <https://intellipaat.com/academy/course/java-training/>
3. <https://www.udemy.com/course/java-tutorial/>

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS491.1	Understand the core concepts of Java programming
U23CS491.2	Explain the principles of object-oriented programming (OOP) and apply them to develop Java applications.
U23CS491.3	Analyze and apply the concepts of strings, collections, and Java 8 features to solve programming problems
U23CS491.4	Develop Java applications with effective exception handling mechanisms and implement multithreading concepts
U23CS491.5	Design and develop windows-based applications using JavaFX, incorporating various GUI components and event handling mechanisms.

U23CS453	Design and Analysis of Algorithms Laboratory	L	T	P	J	C
		0	0	4	0	2

1. Course Description:

In this practical course students will immerse themselves in the application of foundational algorithm techniques to real-world problems. Through hands-on exercises, coding assignments and project work, students will gain practical experience in Algorithm Analysis Techniques, including Brute Force, Divide-and-Conquer, Dynamic Programming, Greedy Approach, Backtracking and Branch and Bound. By implementing these algorithms in various programming languages, students will develop a deep understanding of their operation, efficiency and applicability across different problem domains. Through iterative refinement and experimentation, students will hone their algorithmic design skills, learning to optimize solutions for performance and scalability.

2. Course Objectives:

1. Instruct students on analyzing algorithmic efficiency, including time and space complexity, to evaluate and compare algorithm performance.
2. Guide students in developing efficient solutions to complex problems using brute force and divide-and-conquer techniques.
3. Teach students dynamic programming techniques for solving complex optimization problems.
4. Enable students to understand and apply the greedy approach for solving optimization problems.

- Equip students with problem-solving strategies using backtracking and branch-and-bound techniques.

3. List of Experiments:

60 Periods

- Implementation of string algorithms (CO1)
- Demonstration of applications of string algorithms (Naïve algorithm, Rabin Karp Algorithm, KMP Algorithm and Manachers algorithm) (CO1)
- Implementation of brute force and divide-and-conquer techniques (CO1)
- Demonstration of applications of brute force and divide and conquer techniques (Boyer Moore algorithm, Travelling salesman problem, Knapsack problem, Assignment problem, Jump game, Maximum subarray, Merge Intervals, Tiling problem, Karatsuba algorithm) (CO2)
- Implementation of dynamic programming (CO3)
- Demonstration of applications of dynamic programming (Warshall's algorithm, Floyd's algorithm, Knapsack Problem, Longest Common Subsequence, Levenshtein distance (Edit distance) problem, Longest palindrome, Longest common substring, Longest happy string, Palindrome partitioning, Minimum coin change, Equal subset sum partition, Wildcard matching, longest repeated subsequence)(CO4)
- Implementation of Greedy approach(CO4)
- Demonstration of applications of Greedy approach (Activity Selection Problem, Graph Colouring Problem, Huffman coding compression algorithm, shortest superstring problem, Flip the world, Dials algorithm, Minimum spanning tree, Sieve of sundaram, Remove invalid parenthesis, Maximum ribbon cut) (CO4)
- Implementation of backtracking and branch & bound(CO5)
- Demonstration of applications of backtracking and branch & bound (Queen problem, Hamiltonian circuit problem, Knight's tour problem, Subset sum problem, Sudoku Solver, Letter combinations of a phone number, Combinatorial optimization problems, Zigzag conversion, Valid Sudoku, People holding hands, Reverse pairs) (CO3 , CO4, CO5)

Mini project: Create a simple gaming application

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS453.1	Implement various algorithm design strategies in a programming environment and analyze their time and space complexities
U23CS453.2	Apply brute force, divide and conquer strategies for sorting and searching tasks

U23CS453.3	Implement dynamic programming solutions for complex optimization and pathfinding problems
U23CS453.4	Apply greedy algorithms to solve optimization problems
U23CS453.5	Analyze the time and space complexities of different algorithms

U23CS454	Database Management Systems Laboratory	L	T	P	J	C
		0	0	2	0	1

1. Course Description:

This practical course offers hands-on experience in essential database concepts and technologies. Students will explore into Introduction to Databases, mastering the fundamentals of data modelling and relational database design. They will then explore Structured Query Language (SQL) and Procedural Language/SQL (PL/SQL), acquiring skills in querying and manipulating data. Through practical exercises, students will learn Transaction and Concurrency Control techniques, ensuring data integrity and consistency in multi-user environments. Additionally, they will gain proficiency in Storage & Indexing, optimizing database performance through efficient data storage and retrieval strategies. Finally, students will explore NoSQL databases, understanding their unique characteristics and applications in modern data management scenarios

2. Course Objectives:

1. To enable students to understand the fundamental concepts and principles of database management.
2. To teach students to master the database querying and programming using SQL and PL/SQL
3. To foster students to learn the principles and mechanisms of transaction processing and concurrency control
4. To familiarize students to design and implement efficient database storage and indexing solutions
5. To acquaint students to effectively use NoSQL databases to build scalable, high-performance applications

3. List of Experiments:

30 Periods

- 1 ER Diagrams (CO1)
Create an Entity Relationship model for the above applications
- 2 SQL Queries (CO2)
Develop the SQL Queries using the following commands for the database
 - a. DDL commands - Create, alter (Add, Modify, Rename), Truncate, Drop commands
 - b. DML commands - Insert, Update, and Delete commands
 - c. DQL commands - Select and its basic operations
 - d. DCL commands - Commit, Rollback, and Savepoint operations
 - e. TCL commands - Grant and Revoke operations for the different users
- 3 Implementation of Key constraints(CO2)
 - a. Build the Integrity Constraints - Unique, NOT NULL, Auto Increment, Primary Key, Foreign Key, Check, Default constraints for the given databases
- 4 Advanced SQL Queries(CO2)
Implementation of Aggregate Functions
 - a. Find the total count of all the records in the table

Chairman - Board of Studies

Department of Computer Science and Business Systems

Sri Eshwar College of Engineering (Autonomous)

Kinathukadavu, Coimbatore - 641202.

- b. Find the average value of a specific column in the table
 - c. Find the maximum/min/sum value of a specific column in the table
 - d. Find the count of all distinct values in a specific column in the table
- 5 Implementation of Group By Clause(CO2)
- a. Find the average/max/min/sum of all values of a specific column for each group records in the table
 - b. Find the count/average/max/min of all records in the table grouped by multiple columns
- 6 Implementation of OrderBy Clause(CO2)
- a. Sort the list of all records in the table by multiple columns/specific columns in ascending or descending order
 - b. Find the top/ bottom 10 records in the table sorted by a specific column/multiple columns
 - c. Find the list of all records in the table sorted by a specific column/multiple columns and limited to a certain range
- 7 Implementation of String Functions(CO2)
- a. Find the length of characters in a specific string
 - b. Find the leftmost/rightmost portion of a specific string up to a certain character or length
 - c. Find the specific portion of a string extracted using a regular expression pattern
 - d. Find the specific string with all occurrences of a certain character or pattern replaced with another character or string
 - e. Find the specific string converted to uppercase or lowercase
 - f. Find the specific string with leading or trailing whitespace characters removed
 - g. Find the specific string with a certain character or substring removed or replaced
 - h. Find the specific string with a certain character or substring added at a certain position
 - i. Find the specific string with all occurrences of a certain substring concatenated with another substring
- 8 Implementation of Date function(CO2)
- a. Find the current date and time in MySQL
 - b. Find the day of the week for a specific date in MySQL
 - c. Find the month/year for a specific date in MySQL
 - d. Find the difference between two specific dates in MySQL
 - e. Find the date in MySQL after adding/subtracting a specific number of days to a specific date.
 - f. Find the number of days/average time between two specific dates in MySQL
 - g. Find the earliest or latest date in a specific column of the table in MySQL
- 9 Implementation of Nested queries(CO3)
- a. Find the maximum/min/count/sum/average/distinct count value of a specific column in the table for a specific subset of records selected using a nested query
 - b. Find the average/max/sum/count/min value of a specific column in the table where the value of another column is equal to a specific value selected using a nested query
 - c. Find the maximum value of a specific column in the table for a specific subset

of records selected using a nested query within another nested query

10 Implementation of Joins(CO3)

- a. Find the result of an inner/left/right/full outer/cross joins between two/multiple tables on a specific column in MySQL

11 Construction of Index(CO3)

- a. Create an index for the database and show the comparative analysis of Query execution time with and without using an index for the given scenario

12 Implementation of views(CO3)

- a. Perform the DDL, DML, and DQL operations on the views and check the consistency of the relations
- b. Create different types of views and their categories of the REFRESH command.
- c. Implement the materialized views with Aggregate and Join queries

13 PLSQL(CO4)

Develop a program in PLSQL using Before/After trigger, row, and statement trigger and instead of trigger

- a. Develop a program in PLSQL using Before/After trigger, row, and statement trigger and instead of trigger.
- b. Create a trigger and check for the before/after insertion, update, and deletion operations in the table.

14 NOSQL(CO5)

Implementation of MongoDB application and run through CRUD operations

- a. Command to create a collection and a document in MongoDB
- b. Command to insert/update/delete a document in a MongoDB collection
- c. Command to query a MongoDB collection to retrieve documents that meet certain criteria
- d. Command to use aggregation pipelines to perform more complex queries in MongoDB
- e. Command to create an index in MongoDB to improve query performance

15 Create tables and execute the queries using Click House(CO5)

- a. Command to create a table, view, and functions
- b. Command to insert the data in a table from compressed files, Infiles, and multiple files
- c. Command to query the data using the SELECT, WHERE, JOIN, GROUPBY, HAVING clauses
- d. Command to query the data using the Regular, Aggregate, and Table functions

Design a project for the following application using JDBC Connectivity

- Online Food Ordering System
- Online Movie Ticket Booking System
- Online Parking System
- Online Hotel Room Booking System

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS454.1	Demonstrate the ability to identify, define, and analyze complex problems using ER diagram
U23CS454.2	Write queries for different business requirements
U23CS454.3	Implement Joins, Nested queries and built in functions for different database applications
U23CS454.4	Design and implement reusable PL/SQL procedures, functions and triggers that encapsulate business logic and perform complex data manipulations efficiently
U23CS454.5	Analyze data storage design and implement the operations of a NoSQL database

U23EM753	Advanced Logical Thinking	L	T	P	J	C
		0	0	2	0	1

1. Course Description:

This course aims to develop student’s logical thinking skills to an advanced level. Students will explore various techniques and strategies to analyse, evaluate, and synthesize information effectively. Analyzing a situation or problem using a logical approach involves gathering all available information, assessing the facts and efficiently deciding the best course of action. Students strive to understand various topics deeply, enhance their memory skills and build greater understanding. They also apply their ideas effectively and thoroughly analyze any arising issues.

2. Course Objectives:

- Enhance Critical thinking skills by solving programming logic problems involving permutations and combinations.
- Enhance the Decision making skills using different Possibilities through Probability
- To develop the skills to analyze complex problems in Simple Solutions through Time Speed Distance Concept

4. Enhance the strategic thinking for Solving Real life problems using Mathematical Concepts	
5. Reinforce the Logical skills through Reasoning Puzzles	
3. Syllabus:	30 Periods
Unit-I: Inductive Reasoning through Permutations & Combination	(6)
Fundamental Principles of Counting: Permutations & Combination, Number Generation Fundamentals; Digit repeater concepts: All possible ways; Recursion and Backtracking: N step Problems, Chess oriented problems and Case Studies.	
Unit-II: Decision Making based on Probability	(6)
Introduction to Probabilities, Application of Probability; Power of Compounding: Case Studies.	
Unit-III: Strategic techniques in Time, Speed and Distance	(6)
Definition and Basics of Time, Speed and Distance; Relative speed: Problems based on Trains; Effective Speed: Problems based on Boats and Streams; Problems based on Races, Escalator problems; Case Studies.	
Unit-IV: The Logical Approach to Mixture and Allegation	(6)
Introduction to Mixtures: Multi variable mixing, Profit and Loss concept based on mixing; Liquid mixing concepts: Replacement problems and Repetitive iteration problems.	
Unit-V: Logical Reasoning	(6)
Introduction to design of clocks; Formula creation: Speed clock and Slow clock problems; Angle calculation; Calendars design: Concept of odd days, Day of a date and Calendar repetition logic; Data Arrangements; Data Sufficiency; Directions; Number series and Puzzles.

3. https://www.indiabix.com/	

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23EM753.1	Develop the ability to use inductive reasoning to solve complex problems involving permutations and combinations.
U23EM753.2	Understand probability theory to make informed decisions under uncertainty.
U23EM753.3	Utilize strategic techniques to solve problems related to time, speed, and distance.
U23EM753.4	Apply logical reasoning to solve problems involving mixtures and allegations.
U23EM753.5	Enhance logical reasoning skills to tackle a variety of analytical problems.

U23MC903	Environmental Science	L	T	P	J	C
		1	0	0	0	NC
1. Course Description:						
Environmental Science for Engineering Students offers a focused exploration of key environmental concepts tailored to the needs and interests of engineering students. This course provides a comprehensive understanding of environmental issues relevant to engineering practice, emphasizing the application of scientific principles and engineering solutions to address environmental challenges. Students will develop the knowledge, skills, and perspectives necessary to integrate environmental considerations into engineering design, planning, and decision-making processes.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. To impart knowledge on the principle of environmental science and engineering. 2. To make students understand the ecosystems and natural resources. 3. To enable students understand the various causes for environmental degradation. 4. To create awareness on pollution, value education, population growth and social issues. 5. To enhance the current opportunities in sustainability and its solution in environmental aspects. 						
3. Syllabus :						15 Periods
Unit-I: Environment and Ecosystem						(3)
Scope and importance; concept of sustainability and sustainable development: concept of an ecosystem, structure and function of an ecosystem; producers, consumers and decomposers; Energy flow in the ecosystem, food chains and food webs.						
Unit-II: Environmental Pollution and Analysis						(3)
Environmental pollution: types, causes, effects and controls, Air, Water, soil and noise Pollution, Role of individual in control of pollution; Nuclear hazards and human health risks.						
Unit-III: Natural Resources						(3)
Land resources and land use change: Land degradation, soil erosion and desertification; Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations; Water: Use and over-exploitation of surface and ground water.						
Unit-IV: Social Issues and Environmental Polices						(3)
Environmental Issues; Environmental ethics; Climate change: global warming, ozone layer depletion and acid rain; Environment Laws: Environment Protection Act, Air (Prevention & Control of Pollution) Act, Water (Prevention and Control of Pollution) Act, Wildlife Protection Act, Forest Conservation Act.						
Unit-V: Human Population and the Environment						(3)
Population growth: variation among nations, Population explosion, Family Welfare Programmes; Environment and human health: Human Rights, Value Education; Women and Child Welfare; Role of Information Technology in Environment and Human Health.						
Text Books:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23MC903.1	Outline the structure and functions of an eco system
U23MC903.2	Categorize the different types of pollution and its preventive measures
U23MC903.3	Interpret the importance of natural resources in environment
U23MC903.4	Identify the social issues and to utilize the environmental policies
U23MC903.5	Apply role of IT in human population and environment

SEMESTER – IV

U23CB101	Introduction to Innovation, IP Management and Entrepreneurship	L	T	P	J	C
		3	0	0	0	3
1. Course Description:						
Introductory exploration into the dynamic realms of innovation, intellectual property Rights (IPR), management, and entrepreneurship. Participants will gain a comprehensive understanding of fundamental concepts, processes, and strategies essential for thriving in today's competitive business landscape.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Develop a foundational understanding of innovation as a driver of economic growth, types and sources of innovation, including product, process, and business model innovation. 2. Gain insight into the significance of intellectual property rights (IPR) in protecting and leveraging innovation assets. 3. Provide a comprehensive understanding of patent processes, ownership, infringement, and recent legal developments, enabling effective management of patent-related challenges. 4. Understand the process and kinds of Entrepreneurship, Entrepreneurial ecosystem, and factors influencing entrepreneurship. 5. Examine the entrepreneurial mindset, identifying opportunities, and evaluating feasibility for new venture creation using Business Model Canvas & Value proposition canvas. 						
3. Syllabus:						45 Periods
Unit-I: Innovations						(9)
Introduction to Innovation: Scope, types, Process of innovation, Different aspects of innovation, Forms of innovation, Innovation models: Type of innovation models; Innovation lifecycle; Sources of innovation: Forms of innovation: Strategy in innovation: Steps in strategy formation, Innovation and strategy in new format, Implementation of new strategy, Importance of innovation, and Steps for developing strategy.						
Unit-II: Intellectual Property Rights (IPR)						(9)
Introduction to IP: Importance of IP, Role, scope of IP, Kinds of intellectual property rights, Needs and importance of Property rights; Introduction to trademarks: Trademarks and its importance, Registration procedure, Procedure for cancellation; Copyright: Registration of copyrights, Applying for copyrights, Procedure for obtaining copy rights, Copy right protection.						
Unit-III: Foundations of Patents						(9)
Patent: Patent Searches, Applications, Post issuance proceedings; Patent ownership and Transfer; Patent Infringement; Law: New Developments and International Patent Law, Trade Secret Law and unfair competition.						
Unit-IV: Entrepreneurship						(9)
Introduction to Entrepreneurship-Establishing a new Enterprise & Step by Step process-Financial Requirements of a New Enterprise-Managing a New Enterprise.						
Unit-V: Expansion Strategies						(9)
Enterprise-Business continuity Plan - Small Scale Enterprises -Institutional Support for Small Enterprises-Challenges for Small Enterprises-Franchising –Introduction to Corporate Social Responsibility and Business Ethics

MOOC/NPTEL/SWAYAM Course:

1. <https://archive.nptel.ac.in/courses/110/107/110107094/>

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CB101.1	Apply knowledge of innovation processes, models, and strategies to develop and implement innovative solutions in various contexts.
U23CB101.2	Apply understanding of intellectual property rights, including trademarks and copyrights, to protect and manage creative and innovative works effectively.

U23CB101.3	Apply skills and knowledge to manage all aspects of patents, including searches, applications, post-issuance procedures, ownership, infringement, and staying informed on legal developments.
U23CB101.4	Apply insights into the entrepreneurship ecosystem to identify opportunities, overcome barriers, and foster successful entrepreneurial ventures.
U23CB101.5	Apply entrepreneurial mindsets and methodologies to generate ideas, develop business models, and create comprehensive business plans.

U23CB401	Operating Systems	L	T	P	J	C
		3	0	0	0	3

1. Course Description:

This course introduces students to the fundamental principles and concepts underlying modern operating systems. Through lectures, practical exercises, and assignments, students will gain a deep understanding of the design, implementation, and management of operating systems. Topics covered include process management, memory management, file systems, device management, security, and virtualization. Emphasis will be placed on both theoretical concepts and practical applications, with hands-on experience in working with various operating systems.

2. Course Objectives:

1. To understand the core principles and architecture of operating systems, including kernel types and process management.
2. To implement CPU scheduling and synchronization techniques to manage concurrent processes.
3. To analyse and identify appropriate strategies for handling deadlock situations, and to apply advanced memory management techniques effectively.
4. To manage virtual memory and file systems for optimal resource allocation and storage efficiency.
5. To gain expertise in real-time operating systems (RTOS) and virtualization technologies to address modern system challenges.

3. Syllabus:

45 Periods

Unit – I Kernel and Process Management

(9)

Operating System Overview: Objective and Functions-Types of Operating System-Services-Boot Block- Kernel- Microkernel-Monolithic Kernel-Macro Kernel-System Calls Processes: States of Process-Process Control Block (PCB)-Context Switch-Creation and Termination-Inter-process Communication Threads: Introduction-Multithreading Models-Thread Libraries-Threading issues Case Study: Zombie Process and their Prevention-Lottery Process Scheduling

Unit – II CPU Scheduling and Process Synchronization

(9)

CPU Scheduling: Scheduling – Scheduling Criteria-Scheduling Algorithms: Pre-emptive and Non-Preemptive Scheduling (FCFS, SJF, LRTF, Round-Robin, Priority)-Process Synchronization: The Critical Section Problem-Peterson's Solution-Synchronization Hardware-Mutex Locks-Semaphores-Classical Problems of Synchronization-Producer Consumer Problem-Dining Philosophers Problem Case Study: Sleeping Barber Problem-Dekker's Algorithm-Bakery Algorithm

Unit– III Deadlock and Memory Management

(9)

Deadlocks: Necessary Conditions -Resource Allocation Graph- Deadlock Prevention, Deadlock Avoidance-Banker's Algorithm-Deadlock Detection-Recovery from Deadlock Main Memory Management: Swapping-Contiguous Memory Allocation-Paging- Segmentation-Segmentation with paging Case Study: Snow Cone: Android Memory Management.	
Unit- IV Virtual Memory Management and Secondary Storage	(9)
Virtual Memory Management: Demand Paging-Page Replacement (FIFO, LRU, Optimal)- Allocation of Frames-Thrashing File Management: Overview-Organization-Access-File Directories-File Structures-File Sharing and Protection-Allocation Methods-Free Space Management Mass Storage Structure: Mass Storage System-Disk Structure-Disk Scheduling and Management-Swap Space management-I/O Management and Disk Scheduling Case Study: Buddy Memory Allocation Scheme in Operating Systems	
Unit – V RTOS And Virtualization	(9)
RTOS: Introduction to real-time systems and OS- RTOS services, real-time tasks- RTOS memory management- Free RTOS Virtualization: Process and System VMs-Taxonomy of VMs -Hardware Emulation-Full Virtualization with binary translation-Hardware assisted -Operating System-Virtualization- Case Study: RTOS for fault Tolerant Applications-Container /Docker

MOOC/NPTEL/SWAYAM Course:	
<ol style="list-style-type: none"> 1. https://onlinecourses.nptel.ac.in/noc21_cs88/preview. 	

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CB401.1	Analyse the states of a process and explain the role of the Process Control Block.
U23CB401.2	Evaluate CPU Scheduling Algorithms and Implement Synchronization Mechanisms.

Chairman Board of Studies

Department of Computer Science and Business Systems
Sri Eshwar College of Engineering (Autonomous)
Kinathukadavu, Coimbatore - 641202.

U23CB401.3	Design Solutions for Deadlocks and Implement Memory Management Strategies.
U23CB401.4	Apply their understanding of file management concepts, including file directories, structures, and sharing, to real-world scenarios.
U23CB401.5	Apply their understanding of Real-Time Operating Systems and virtualization to real-world scenarios.

U23MA282	Computational Statistics	L	T	P	J	C
		3	0	2	0	4
1. Course Description:						
Computational statistics is an interdisciplinary field that focuses on the development and application of computational methods for statistical analysis, modelling, and inference. It involves the use of computational algorithms, techniques, and tools to address complex statistical problems and analyse large datasets efficiently.						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. Impart concepts in non-parametric inference tests. 2. Focus on time series analysis to identify patterns and trends within data. 3. Facilitate the principles and characteristics of the multivariate data analysis techniques. 4. Enhance them to reduce the dimensionality of the features through discriminant analysis. 5. Equip them with various optimization techniques for effective clustering implementation. 						
3. Syllabus		45 + 30 = 75 Periods				
Unit-I: Non - Parametric Inference						(9)
Comparison with parametric inference; Use of order statistics; Non parametric tests: Sign test, Wilcoxon signed rank test, Mann - Whitney test, run test, Kolmogorov - Smirnov test, Spearman's and Kendall's test.						
Unit-II: Time Series Analysis						(9)
Basics of time series analysis; Stationary: ARIMA Models; Identification; Estimation and forecasting (simple problems).						
Unit-III: Multivariate Analysis						(9)
Multivariate normal distribution functions; Conditional distribution and its relation to regression model; Multivariate analysis of variance and covariance.						
Unit-IV: Linear Discriminant Analysis and Principal Component Analysis						(9)
Discriminant analysis: Statistical background, linear discriminant function analysis, estimating linear discriminant functions and their properties; Principal component analysis: Principal components, algorithm for conducting principal component analysis, retaining principal components; H-plot.						
Unit-V: Factor Analysis and Clustering						(9)
Factor Analysis: Factor analysis model, extracting common factors, determining number of factors, transformation of factor analysis solutions, factor scores; Clustering and segmentation analysis: Introduction, types of clustering, correlations and distances, clustering by partitioning methods, hierarchical clustering, overlapping clustering, K-Means clustering, profiling and interpreting clusters.						

Laboratory Exercises:	30 Periods
<ol style="list-style-type: none"> 1. Use pandas to load datasets (CO 1) 2. Perform Wilcoxon signed rank test to determine the significant difference between two related samples. (CO 1) 3. Measure the strength and direction of association between two ranked variables using Spearman's and Kendall's test. (CO 1) 4. Load and Visualize Time Series Data. (CO 1) 5. Analyze and predict time series data using ARIMA model. (CO 2) 6. Plot the data and the regression line to visualize the relationship between variables. (CO 4) 7. Predict future outcomes based on supervised data. (CO 4) 8. Reduce the dimensionality of the dataset using principal component analysis. (CO 5) 9. Use a Hierarchical Clustering algorithm partitioning a dataset. (CO 5) 10. Apply K-Means clustering partitioning a dataset. (CO 5)

 Sri Eshwar College of Engineering (Autonomous)
 Kinathukadavu, Coimbatore - 641202.

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23MA282.1	Identify and apply various methods of non-parametric tests for inference.
U23MA282.2	Analyze residuals of time series models to assess the model fit and for identifying the potential improvements.
U23MA282.3	Determine the magnitude of the relationships that may exist between the two or more sets using appropriate multivariate techniques.
U23MA282.4	Understand the basic concepts of discriminant analysis and principal component analysis.
U23MA282.5	Condense the data in many variables into a few variables and the detection of natural partitioning of objects.

U23NCC02	NCC Credit Course Level II	L	T	P	J	C
		2	0	2	0	3

1. Course Description:

NCC Course Level II designed by UGC as a general elective course, equips students with essential skills for emergency response, fieldwork, and military activities. Students acquire expertise in disaster management, including coordinating relief efforts and managing various disaster scenarios. They also enhance their communication and navigation skills, mastering map reading and compass usage. This course provides a foundational understanding of the Armed Forces while advancing the field and battle skills of students. Overall, cadets enhance their physical fitness, agility, and discipline through rigorous training, culminating in a remarkable improvement in their overall agility and readiness.

2. Course Objectives:

1. Equip students with the necessary skills to maintain health and safety standards, respond effectively to medical emergencies, and manage patient care during crises
2. Instruct students in the principles of disaster management, enabling them to respond effectively to emergencies, collaborate with relevant authorities, and support relief efforts.
3. Develop students' proficiency in communication and map reading, including interpreting various map features, using navigation tools, and understanding geographic orientation.
4. Educate students on the structure and roles of the armed forces, pathways for entry, and the significance of military honors and awards.
5. Train students in essential field and battle craft skills, focusing on distance estimation, terrain analysis, camouflage, and effective communication

3. Syllabus:

30 + 30 = 60 Periods

Unit-I: Health & Hygiene

(6)

Hygiene & Sanitation, Cleanliness, Water supply and its purification, Physical and Mental Health, First Aid: Common Medical Emergencies, Dressing of Wounds, Fracture & Treatment, Evacuation of Casualties, Methods of Carrying a Patient.

Unit-II: Disaster Management

(6)

Civil Defence Organizations, Natural Disaster Management Authority (NDMA), National Disaster Responsive Force (NDRF), Types of Disaster, Fire Fighting, Traffic Control, Methods of NCC Assistance, Relief Camp, Collection & Distribution of Aid Material

Unit-III: Communication & Map Reading	(6)
Communication, Introduction to types of maps & conventional signs, Scales & Grid System, Relief, Contours & Gradients, Cardinal points & Types of North, Types of Bearing, Service Protractor, Prismatic Compass.	
Unit-IV: Armed Forces	(6)
Basic organization of Armed forces & Army, Modes of Entry to Army, Honours & Awards, Concept of Integrated Defence staff.	
Unit-V: Field Craft & Battle Craft	(6)
Introduction to FC&BC, Judging Distance, Description of ground, Observation camouflage & concealment, Field Signal, Section Formation, Fire Control Orders, Fire & Movement.	
List of experiments:	(30 Periods)
<ol style="list-style-type: none"> 1. Evaluate basic drill exercises to enhance discipline, coordination, and teamwork among cadets 2. Provide cadets with basic weapon handling skills, safety procedures, and marksmanship fundamentals. 3. Analyse the basics of map reading, including understanding map symbols, using a compass, and determining coordinates, to enhance their navigation skills. 4. Demonstrate the fundamentals of firing, including safety procedures, weapon handling, and marksmanship, to enhance their shooting skills and discipline. 5. Enhance physical fitness, agility, and confidence among cadets by training them to overcome various obstacles training 	
Text Books:	
1. National Cadet Corps “Cadets Hand Book – Army (Common Subjects)”.	
Web Reference:	
1. https://indiancc.nic.in/	

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23NCC02.1	Evaluate various health and hygiene practices, including first aid techniques, to optimize community health and emergency response efforts and develop effective disaster management plans.
U23NCC02.2	Analyze the organizational structure and operational strategies of Civil Defence Organizations and the strategic plans for career entry into the Armed Forces
U23NCC02.3	Understand the advanced map reading and communication skills to accurately interpret navigational tools
U23NCC02.4	Demonstrate teamwork strategies and physical training through advanced drills and obstacle courses, enhancing coordination and discipline.
U23NCC02.5	Analyse and implement advanced techniques in weapon handling, safety, and navigation,

 Kinathukadavu, Coimbatore - 641202.

U23CS492	Full Stack Development	L	T	P	J	C
		2	0	2	2	4
1. Course Description:						
This is a comprehensive course designed to equip students with the knowledge and skills required to become proficient full stack developers. The course covers essential front-end and back-end technologies, including HTML5, CSS3, JavaScript, React.js, Node.js with Express.js, Spring Boot backend framework, and fundamentals of MongoDB. Through a combination of theoretical lectures, hands-on coding exercises, and real-world examples, students will gain a deep understanding of each technology's role in the development process and how they work together to build modern web applications						
2. Course Objectives:						
<ol style="list-style-type: none"> To empower students to design, develop, and deploy dynamic web applications using HTML5, CSS3, and JavaScript To introduce students to build fast, scalable, and maintainable front-end applications using ReactJS To familiarize students with the skills to effectively use MongoDB to build robust, scalable, and data-driven applications To acquaint students to build scalable and efficient web applications using Node.js and Express.js To equip students with the skills to master Spring Boot's core features 						
3. Syllabus :		30+30+30=90 Periods				
Unit-I: HTML5, CSS3 and JavaScript						(6)
Full Stack Application: component; HTML5: tags, attributes, properties, importance of semantic HTML, classes; CSS3: CSS3 syntax, properties, borders, text, image, grid layout, media queries, animations; Types of CSS frameworks- Tailwind CSS; Overview of JavaScript: advanced working with functions; JavaScript namespaces; Prototypes; Error handling; Modules in JavaScript; Chaining JavaScript methods; Promises.						
Study: Website design for an automobile industry						
Unit-II: Reactjs						(6)
ReactJS: library, directory; React components: types of Components, component composition, component styling, adding styles, component intercommunication, data sharing, routing; Hooks: states, hooks vs states, types of Hooks; Redux: state container for react apps; React bootstrap: props, router.						
Case Study: Portfolio development with authentication.						
Unit-III: MongoDB						(6)
MongoDB: features, environment; Data modelling: Schema creation using mongoose(ODM), create database, data types, drop database; Collection: insert, query, update and delete; Projection: limiting records, sorting records, indexing and aggregation.						
Case Study: Design of a simple search engine.						
Unit-IV: Nodejs and Expressjs						(6)
Tech Stack Comparison; NodeJS: node module system, Node Package Manager (NPM); ExpressJs: building RESTful APIs; Advanced topics: asynchronous JavaScript, CRUD operations using mongoose, mongo data validation, mongoose modeling relationships between connected data, authentication, authorization, and deployment.						

Case Study: QR Code Generator application	
Unit-V: Spring Boot	(6)
Spring Boot: configuration, spring data JPA, create spring data repositories for JPA, web application with Spring Boot, RESTful controllers, message converters, WAR / JAR deployment, creating a RESTful application, HTTP GET, PUT, POST, DELETE.	
Case Study: real time message transfer application.	
List of Experiments:	30 Periods
<ol style="list-style-type: none"> 1. Develop a music streaming web application to provide users with a seamless and interactive music listening experience. Users should be able to discover, play, and share their favourite music in real-time. The application should support multiple features such as user authentication, personalized playlists, real-time updates on trending tracks, and social sharing capabilities (CO1,CO2,CO3,CO4,CO5) 2. Build a video conferencing web application that facilitates seamless communication between individuals or groups through high-quality video and audio interactions and supports real-time features, user authentication, screen sharing to enhance the overall video conferencing experience(CO1,CO2,CO3,CO4,CO5) 3. Develop a dynamic and engaging social media platform web application that connects users globally. The platform aims to provide a seamless and real-time social experience, allowing users to connect, share content, and interact with each other and should incorporate features such as user profiles, real-time feed updates, multimedia content sharing, instant messaging, and community building(CO1,CO2,CO3,CO4,CO5) 4. Create a web application that constitutes a dynamic Content Management System (CMS) tailored for blogging that allows users to effortlessly create, manage, and share blog content and provides an intuitive interface, support multimedia content, and facilitate collaboration among multiple authors(CO1,CO2,CO3,CO4,CO5) 5. Build a web application designed to serve as a real-time Project Management Dashboard to streamline project management processes, enhance collaboration, and provide stakeholders with a dynamic and comprehensive view of project progress. The application should offer real-time updates, intuitive navigation, and advanced project tracking features. (CO1,CO2,CO3,CO4,CO5) 6. Design a web application to perform real-time analytics for data-driven decision-making. This web application aims to empower users to analyze, visualize, and derive insights from streaming data that will be suitable for industries requiring instantaneous data processing, such as finance, e-commerce environments(CO1,CO2,CO3,CO4,CO5) 7. Develop a web application designed to revolutionize the job search process to provide job seekers with real-time access to a diverse range of job opportunities, personalized recommendations, and interactive tools to streamline the entire job searching experience(CO1,CO2,CO3,CO4,CO5) 8. To develop an online crowdfunding web application to facilitate real-time creative financing for innovative projects. which acts as a catalyst for novel ideas by providing a dynamic platform where creators can present their visions, attract support, and turn aspirations into tangible achievements(CO1,CO2,CO3,CO4,CO5) 9. Build a To-Do List web application elevates the task management experience through real-time collaboration and user authentication. This application provides users with an intuitive platform for creating, organizing, and collaborating on to-do lists in real-time, ensuring secure access and personalized task management(CO1,CO2,CO3,CO4,CO5) 10. Develop a chat web application to facilitate real-time communication and collaboration. The web application aims to provide users with a seamless and interactive platform for one-on-one and group chats, ensuring instant messaging, multimedia sharing, and a user-friendly 	

experience(CO1,CO2,CO3,CO4,CO5)	
11.	Develop a comprehensive web application to empower users with a real-time expense tracking system for efficient money management that constitutes users with a user-friendly interface, real-time financial insights, and personalized budgeting features to help them make informed financial decisions and achieve their financial goals(CO1,CO2,CO3,CO4,CO5)
12.	Design a gaming web application that offers a real-time multiplayer gaming experience to provide users with a diverse range of games, interactive features, and a social gaming environment, allowing players to connect, compete, and collaborate in real-time(CO1,CO2,CO3,CO4,CO5)
Projects:	30 Periods
1.	Develop a project for any of the above use cases using MERN stack
Text Books:	
1.	Vasan Subramanian, 'Pro MERN Stack, Full Stack Web App Development with Mongo, Express, React, and Node', Second Edition, Apress, 2019

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CS492.1	Build dynamically enriched web pages with HTML5, CSS3, and JavaScript
U23CS492.2	Implement data handling and fetching in React applications using state management libraries
U23CS492.3	Develop a web application with MongoDB as the backend
U23CS492.4	Develop ExpressJS applications that define routes and handle HTTP requests and responses
U23CS492.5	Develop RESTful APIs with Spring Boot for resource representation, HTTP methods and error handling

Chairman - Board of Studies

U23CB451	Operating Systems Laboratory	L	T	P	J	C
		0	0	2	0	1
1. Course Description:						
<p>The Operating Systems Laboratory complements the theoretical concepts learned in the Operating Systems course by providing hands-on experience with operating system principles and practices. Through a series of guided exercises and projects, students will gain practical skills in operating system design, implementation, and management. This laboratory course focuses on reinforcing key concepts through experimentation, troubleshooting, and real-world application.</p>						
2. Course Objectives:						
<ol style="list-style-type: none"> 1. To understand and implement Linux Commands. 2. To develop Shell Scripts for System Tasks. 3. To implement and analyse System Calls and Deadlock avoidance algorithm. 4. To design and solve Synchronization and Scheduling Problems. 5. To build and test components of an OS Kernel. 						
3. List of Experiments:						30 Periods
<ol style="list-style-type: none"> 1. LINUX Commands. (CO 1) man, touch, cat, mkdir, rm, rmdir, ls, cd, cp, mv, pwd, bc, head, tail, wc, rev, who, echo, finger, find, awk, more, paste, bg, fg 2. Shell Programming (CO 2) Operators and decision-making statements for pattern generation, simulating arithmetic calculator, and printing number series 3. System Calls (CO 3) <ol style="list-style-type: none"> a) Process Management: fork, exec, getpid, exit, wait, close, stat, system b) Inter process Communication: pipe, mkfifo, create, write, read, open, seek, close 4. Demonstrate the Creation of Zombie and Orphan Processes (CO 3) 5. Implementation of Threading & Synchronization Applications (CO 4) 6. CPU Scheduling (CO 4) First Come First Serve, Shortest Job First, Priority and Round-Robin Scheduling Algorithm 7. Process Synchronization (CO 4) <ol style="list-style-type: none"> a) Dining Philosophers' Problem using Semaphore b) Producer Consumer Problem using Semaphore 8. Deadlock Avoidance (CO 3) <ol style="list-style-type: none"> a) Banker's Algorithm 9. Linux Kernel (CO 5) Configuration, compilation, and rebooting from the newly compiled kernel

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CB451.1	Demonstrate the ability to identify, define, and analyze complex problems using appropriate commands, System calls and programming
U23CB451.2	Create solutions and execute them utilizing appropriate programming platforms.
U23CB451.3	Choosing appropriate operating systems in virtualized environments to execute various applications
U23CB451.4	Evaluate the advantages and disadvantages of different design options and consider the associated issues when designing operating systems.
U23CB451.5	Acquire practical understanding of the interaction between programming languages, operating systems, architecture, and effectively utilize them.

U23CB651	Project with Design Thinking (Product / Software Development Life Cycle)	L	T	P	J	C
		0	0	0	2	1

1. Course Description:

The Project with Design Thinking (Product/Software Development Life Cycle) course integrates design thinking principles into the product or software development lifecycle, fostering innovation and user-centricity throughout the project. Students learn to empathize with end-users, define problem statements(TRL 2), ideate potential solutions(TRL 4), prototype designs(TRL 5), and conduct iterative testing to gather feedback and refine their creations(TRL 6). The course emphasizes a multidisciplinary approach(SDG 11), encouraging collaboration between designers, developers, and stakeholders to ensure that the final product meets user needs and business objectives(SDG 12) effectively. Through hands-on projects, students gain practical experience in applying design thinking methodologies within the context of the product or software development process, preparing them to address complex challenges and create impactful solutions in diverse industries.

2.Course Objectives:

1. Identify current problems in computer and communication engineering through literature survey. (TRL 1-2: Basic principles observed, Technology formulation)
2. Design and analyze solutions for identified problems using modern engineering tools. (TRL 3-4: Experimental proof of concept, Technology development, SDG 8: Decent Work and Economic Growth)
3. Create innovative methodologies and develop working models to solve existing problems. (TRL 4-5: Technology development and validation in a relevant environment, Prototype development, SDG 11: Sustainable Cities and Communities)
4. Apply appropriate software development methods to implement and deploy solutions for computer and communication-related issues. (TRL 5-6: Prototype development and demonstration in a relevant environment, Technology demonstration, SDG 12: Responsible Consumption and Production)
5. Evaluate teamwork's role in project execution and estimate financial requirements for project success. (TRL 6-7: System prototype demonstration in an operational environment, Technology readiness for deployment)

3. Guidelines:

30 Peirods

The student identifies the problems in the computer and communication engineering field by conducting a literature or industry survey(TRL 2). After that, the student finds the solution(TRL 4) to solve those problems by applying modern engineering tools. Continuous review will be conducted based on approved rubrics to ensure ongoing progress and quality. After finding the solution, the student develops the working model(TRL 5, SDG 11), design, or simulation for evaluation. Each student shall finally submit a report covering background information, literature survey, problem statement, methodology, and use of modern tools within the stipulated date. Every project work must be guided by the institute faculty members.

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CB651.1	Identify the problems in computer and communication engineering field by literature survey
U23CB651.2	Design, analyze and solve the identified problems by using modern engineering tools
U23CB651.3	Create innovative methodologies to solve the existing problems and developing the working models.
U23CB651.4	Apply appropriate software development methods, to implement and deploy solutions for the computer and communication related problems
U23CB651.5	Implement the role of team work in a project to find the solution and estimate the financial requirement of a project.

U23MC904	Universal Human Values	L	T	P	J	C
		1	0	0	0	NC

1. Course Description:

Universal Human Values explores fundamental ethical principles and humanistic values across cultures. The course encourages critical reflection on compassion, integrity, respect, and empathy, fostering personal growth and societal responsibility. Through interdisciplinary readings and discussions, students gain insights into the universal aspects of human dignity and moral conduct.

2. Course Objectives:

1. Understand what value education is and explore how personal reflection can help achieve happiness and prosperity in life.
2. Learn how to distinguish between the needs of the mind and body, and develop practices for maintaining balance and health.
3. Recognize the importance of trust and respect in relationships, and understand how to foster harmony within families and communities.
4. Understand the interconnectedness of all living things and how to promote mutual fulfillment within nature.
5. Learn the principles of professional ethics, including human values and the role they play in fostering a just and harmonious society.

3. Syllabus:

15 Periods

Unit-I: Introduction to Value Education

(3)

Understanding Value Education, Self – exploration as the process for Value Education, Continuous Happiness and Prosperity - the Basic Human Aspirations, Happiness and Prosperity – Current Scenario, method to fulfil the Basic Human Aspirations

Unit-II: Harmony in the Human Being

(3)

Understanding Human being as the Co-existence of the Self and the Body, Distinguishing between the Needs of the Self and the Body, The Body as an Instrument of the Self, Understanding Harmony in the Self, Harmony of the Self with the Body, Programme to ensure self-regulation and Health

Unit-III: Harmony in the Family and Society

(3)

Harmony in the Family – the Basic Unit of Human Interaction, 'Trust' – the Foundational Value in Relationship, 'Respect' – as the Right Evaluation, Other Feelings, Justice in Human-to-Human Relationship, Understanding Harmony in the Society, Vision for the Universal Human Order

Unit-IV: Harmony in the Nature/Existence

(3)

Understanding Harmony in the Nature, Interconnectedness, self-regulation and Mutual Fulfillment among the Four Orders of Nature, Realizing Existence as Co-existence at All Levels, The Holistic Perception of Harmony in Existence

Unit-V: Implications of the Holistic Understanding – A Look at Professional Ethics

(3)

Natural Acceptance of Human Values, Definitiveness of (Ethical) Human Conduct, A Basis for Humanistic Education, Humanistic Constitution and Universal Human Order, Competence in Professional Ethics Holistic Technologies, Production Systems and Management Models-Typical Case Studies, Strategies for Transition

Text Books:

1. R R Gaur, R Asthana, G P Bagaria, A Foundation Course in Human Values and Professional Ethics, 2nd Revised Edition, Excel Books, New Delhi, 2019. ISBN 978-93-87034-47-1
2. R R Gaur, R Asthana, G , The Teacher's Manual for A Foundation Course in Human Values and Professional Ethics, 2019.

4. Course Outcomes:

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23MC904.1	Compare values and skills, review value education guidelines and content, and evaluate the societal context of happiness and prosperity today.
U23MC904.2	Distinguish between the Self and the Body; comprehend the meaning of Harmony within the Self and the Co-existence of Self and Body.
U23MC904.3	Identify the importance of trust, respect, and positive emotions in relationships and their role in fostering a harmonious society.
U23MC904.4	Demonstrate the harmony in nature and existence, and develop ways to ensure mutually fulfilling participation within nature.
U23MC904.5	Distinguish between ethical and unethical practices, and begin developing a strategy to create a harmonious environment in any workplace.

U23CB521	Human Resource and Compensation Management	L	T	P	J	C
		3	0	0	0	3

1. Course Description:

The course will provide an overview of human resource management, with emphasis in human resource planning and strategy, personnel selection, equal employment opportunity, training, performance appraisal, compensation, and contemporary issues in organizational behavior. The course has been developed for the student of general management whose job will involve responsibility for managing people in a global environment.

Chairman, Board of Studies

Department of Computer Science and Business Systems
Sri Eshwar College of Engineering (Autonomous)
Kinathukadavu, Coimbatore - 641202.

2. Course Objectives:	
<ol style="list-style-type: none"> 1. Recall the organizational structure and strategic role of the HR and Personnel Department, understanding its functions and alignment with overall business strategy. 2. Interpret the significance of Recruitment and Selection processes within organizations, discerning the alignment of these practices with organizational goals and culture. 3. Utilize various Training and Development methods to enhance employee skills and competencies, integrating principles of adult learning and organizational objectives. 4. Examine the relationship between Financial Compensation and its impact on productivity and morale within organizations, identifying key factors influencing employee motivation and satisfaction. 5. Assess the significance of Building Relationships in the workplace, recognizing its impact on organizational culture, employee morale, and productivity, while considering diverse perspectives and experiences. 	
3. Syllabus:	45 Periods
Unit-I: Introduction	(9)
Human Resources Management; Context and Concept of People Management in a Systems Perspective; Organisation and Functions of the HR and Personnel Department: HR Structure and Strategy; Role of Government and Personnel Environment including MNCs.	
Unit-II: Recruitment and Selection	(9)
Recruitment and Selection; Human Resource Information System [HRIS]; Manpower Planning; Selection: Induction & Orientation; Performance and Potential Appraisal; Coaching and Mentoring; HRM issues and practices in the context of Outsourcing as a strategy.	
Unit-III: Human Resource Development	(9)
Human Resources Development: Training and Development Methods; Design & Evaluation of T&D Programmes; Career Development; Promotions and Transfers; Personnel Empowerment including Delegation; Retirement and Other Separation Processes.	
Unit-IV: Compensation Management	(9)
Financial Compensation: Productivity and Morale; Principal Compensation Issues & Management; Job Evaluation; Productivity, Employee Morale and Motivation; Stress Management; Quality of Work Life.	
Unit-V: Human Resource Framework	(9)
Building Relationships; Facilitating Legislative Framework; Trade Unions: Managing Conflicts, Disciplinary Process; Collective Bargaining; Workers Participation in Management; Concept, Mechanisms and Experiences.

4. Course Outcomes :

After successful completion of the course, the student should be able to:

CO. No.	Course Outcome
U23CB521.1	Understand how the organizational structure and strategic role of the HR and Personnel Department align with overall business strategy, considering its functions within the company.
U23CB521.2	Apply an understanding of the significance of Recruitment and Selection processes within organizations to discern their alignment with organizational goals and culture, fostering strategic HR decision-making.
U23CB521.3	Apply various Training and Development methods to improve employee skills, aligning with organizational objectives.

U23CB521.4	Analyse the correlation between Financial Compensation and its effects on productivity and morale within organizations, identifying key factors shaping employee motivation and satisfaction levels.
U23CB521.5	Evaluate the impact of workplace relationships on organizational culture, morale, and productivity through diverse perspectives.
